company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Birch Mountain Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Birch Mountain Resources Ltd. business.

About Birch Mountain Resources Ltd.

Birch Mountain Resources, Ltd. engages in the production and sale of limestone aggregate products. The company holds metallic and industrial mineral rights over a portion of the Athabasca region.

The company operates the Muskeg Valley Quarry (MVQ), an early production stage limestone quarry that produces limestone aggregate products for sale to customers in the Athabasca oil sands region of northeastern Alberta. The MVQ produces various products from limestone rock and crushed limestone rock in the form of aggregate or reagent limestone.

The company conducts mineral exploration of the Hammerstone Project. The Hammerstone Project, which encompasses the MVQ, is located within Birch's Athabasca mineral property, approximately 60 km north of the City of Fort McMurray near the hamlet of Fort McKay, Alberta.

The company also has a 49% interest in a joint venture partnership operating as Hammerstone Products Ltd. The other joint venture partner is the Fort McKay First Nation who owns the remaining 51% interest. Hammerstone Products Ltd. provides a marketing service and receives a limestone marketing fee on all limestone product sold

from MVQ and the Hammerstone Project.

Mineral Properties

Birch's mineral properties are located in northeast Alberta and they are collectively called the Athabasca mineral property.

Mineral Tenure in Alberta

Mineral Permits: Birch holds mineral permits issued by the Alberta Department of Energy. Mineral permits convey the right to explore for metallic and industrial minerals.

Mineral Leases: Birch also holds mineral leases issued by the Alberta Department of Energy. Mineral leases convey the right to develop and produce metallic and industrial minerals. In addition to Alberta mineral leases, Birch holds one Mineral Lease Agreement issued by Indian and Northern Affairs Canada. This agreement conveys the mineral rights, including limestone, on lands included as part of a Treaty Settlement agreement between Canada and the Fort McKay First Nation.

Athabasca Mineral Property

As of December 31, 2007, Birch's Athabasca mineral property covered 317,626 hectares (784,851 acres). The Athabasca mineral property is located in the Regional Municipality of Wood Buffalo (RMWB) in northeast Alberta, Canada.

History

Birch Mountain Resources, Ltd. was founded in 1994.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
