The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of BlackPearl Resources Inc. business.

About BlackPearl Resources Inc.

BlackPearl Resources Inc. focuses on the exploration, development and production of heavy oil in western Canada and the United States. The company also holds interests in various natural gas properties.

Properties

The company's primary properties include Onion Lake, Saskatchewan – heavy oil; Mooney, Alberta – heavy oil; Blackrod, Alberta – heavy oil; and San Miguel, Texas – heavy oil.

Mooney, Alberta: Mooney is a conventional heavy oil play located in north-central Alberta. The company has a 98% working interest in 79 sections in the area. The field contains approximately 150 million barrels of oil-in-place. The field covers an area of 47,020 net acres; and has 8,220 Mboe of 2P reserves. During 2008, the company drilled 12 additional horizontal wells on the field.

Onion Lake, Saskatchewan: Onion Lake is a conventional heavy oil play, located on the Onion Lake First Nations lands along the Alberta/Saskatchewan border near Lloydminster. The company holds an 87.5-100% working interest in the lands. Its

working interest partner is the Onion Lake First Nations development corporation. The field contains approximately 400 million barrels of oil. As of December 31, 2008, the company had drilled a total of 44 wells on the property. It covers an area of 17,528 net acres; and has 11,391 Mboe of 2P reserves.

Blackrod, Alberta: Blackrod is a SAGD opportunity located in the Athabasca Oil Sands region in northern Alberta. The company has an 80% working interest. It has also become operator of the project. In 2008, it also acquired a 100% interest in 31 sections (19,840 acres) of oil sands leases contiguous to the main Blackrod area. The property covers an area of 30,080 net acres; and 69,920 Mbbls of 3P reserves. The project area has approximately one billion barrels of oil-in-place. As of December 31, 2008, 18 wells had been drilled on the main project area.

Acquisitions

In January 2009, the company acquired 100% of the shares of BlackCore Resources Inc. (BlackCore). The principle assets of BlackCore consist of a 100% working interest in the John Lake Field in Northern Alberta.

Dispositions

In May 2008, the company sold assets in the Lloydminster, Celtic, Pike's Peak and Thunderchild areas of Saskatchewan.

In December 2008, the company sold all of its interests in certain lands, wells, pipelines and other associated equipment located in the Palo Duro Basin area of Texas.

In February 2009, the company sold its investment in Serrano Energy Ltd.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
