The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Boise Inc. business.

## **About Boise Inc.**

Boise Inc. is a manufacturer of packaging products and papers, including corrugated containers, containerboard, label and release and flexible packaging papers, imaging papers for the office and home, printing and converting papers, newsprint, and market pulp in the United States.

The company owns pulp and paper mill operations in the following locations: Jackson, Alabama; International Falls, Minnesota; St. Helens, Oregon; and Wallula, Washington, all of which manufacture uncoated freesheet paper. The company also owns a mill in DeRidder, Louisiana, which produces containerboard (linerboard) and newsprint. In addition, the company has a network of five corrugated container plants located in the Pacific Northwest, a corrugated sheet plant in Nevada, and a corrugated sheet feeder plant in Texas.

## **Segments**

The company operates its business in Paper and Packaging segments.

### **Paper segment**

**Products:** The company manufactures and sells a range of papers, including

communication-based papers, packaging-demand-driven papers, and market pulp.

The company is a manufacturer of uncoated freesheet in North America. The company classifies cut-size office papers, printing and converting papers, label and release, and flexible packaging products as uncoated freesheet. Total Paper segment capacity, including corrugating medium and market pulp was approximately 1.5 million short tons (a short ton is equal to 2,000 pounds), as of December 31, 2009.

**Customers:** The company's major customer in this segment was OfficeMax, as of December 31, 2009. In addition to OfficeMax, the company had approximately 800 uncoated freesheet paper customers. Its customers include paper merchants, commercial and financial printers, paper converters, such as envelope and form manufacturers, and customers who use its paper for specialty applications, such as label and release products.

### Packaging segment

**Products:** The company manufactures and sells corrugated containers and sheets, as well as linerboard and newsprint. Containerboard is used in the production of corrugated containers and sheets. The company's corrugated containers are used in the packaging of fresh fruit and vegetables, processed food, beverages, and other industrial and consumer products. Corrugated sheets are sold primarily to converting operations, which finish the sheets into corrugated container products. As of December 31, 2009, its Packaging segment produced approximately 544,000 short tons of linerboard, and its Paper segment produced approximately 126,000 short tons of corrugating medium, both of which are used in the production of corrugated containers.

**Customers:** As of December 31, 2009, the company sold its finished corrugated containers to approximately 1,100 active customers, including large agricultural producers and food and beverage processors. The company sells corrugated sheets to approximately 200 converters, who use the sheets to manufacture corrugated containers for various customers.

### Competition

The company's competitors include Domtar Corporation (the largest producer), International Paper, Georgia-Pacific LLC., International Paper Company, Smurfit-Stone Container Corporation, Georgia-Pacific LLC, Temple-Inland, Inc., Packaging Corporation of America, AbitibiBowater Inc., White Birch Paper, and Kruger.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
