Abstracts

Boston Scientific Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Boston Scientific Corporation and its competitors. This provides our Clients with a clear understanding of Boston Scientific Corporation position in the [Healthcare Equipment and Supplies](#) Industry.

The report contains detailed information about Boston Scientific Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Boston Scientific Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Boston Scientific Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Boston Scientific Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Boston Scientific Corporation business.

About Boston Scientific Corporation

Boston Scientific Corporation engages in the development, manufacture, and marketing of medical devices worldwide. It offers a range of interventional medical specialties, including interventional cardiology, cardiac rhythm management, peripheral interventions, electrophysiology, neurovascular intervention, endoscopy, urology, women's health, and neuromodulation.

Products

During 2009, the company's products were offered for sale by six business groups: CRM, including Cardiac Rhythm Management and Electrophysiology businesses; Cardiovascular, including Interventional Cardiology and Peripheral Interventions businesses; Neurovascular; Endoscopy; Urology/Women's Health; and Neuromodulation.

Cardiac Rhythm Management

The company develops, manufactures, and markets various implantable devices that monitor the heart and deliver electricity to treat cardiac abnormalities, including

implantable cardiac defibrillator (ICD) systems used to detect and treat abnormally fast heart rhythms (tachycardia) that could result in sudden cardiac death, including implantable cardiac resynchronization therapy defibrillator (CRT-D) systems used to treat heart failure; and implantable pacemaker systems used to manage slow or irregular heart rhythms (bradycardia), including implantable cardiac resynchronization therapy pacemaker (CRT-P) systems used to treat heart failure.

Electrophysiology

Within its Electrophysiology business, the company offers medical devices for the diagnosis and treatment of cardiac arrhythmias. Included in its product offerings are RF generators, intracardiac ultrasound and steerable ablation catheters, and diagnostic catheters. The company's brands include the Blazer cardiac ablation catheter, the Chilli II cooled ablation catheter and the MAESTRO 3000 Cardiac Ablation System.

Interventional Cardiology

Coronary Stent Systems: Coronary stents are tiny, mesh tubes used in the treatment of coronary artery disease, which are implanted in patients to prop open arteries and facilitate blood flow to and from the heart. The company's Liberté bare-metal coronary stent system is designed to improve deliverability and conformability, particularly in lesions.

The company offers paclitaxel-eluting stent system, including its TAXUS Liberté stent system, and its everolimus product franchise. The company markets the PROMUS everolimus-eluting stent system, supplied to the company by Abbott Laboratories, as well as its internally-manufactured everolimus-eluting stent system, the PROMUS Element stent system, which the company launched in its EMEA region, and certain Inter-Continental countries in 2009. The company's product pipeline also includes the TAXUS Element stent system.

Coronary Revascularization: The company markets a line of products used to treat patients with atherosclerosis. The majority of its products in this market are used in percutaneous transluminal coronary angioplasty (PTCA) procedures and include bare-metal and drug-eluting stent systems; PTCA balloon catheters, such as the Maverick balloon catheter; the Cutting Balloon microsurgical dilatation device; rotational atherectomy systems; guide wires; guide catheters; and diagnostic catheters.

Intraluminal Ultrasound Imaging: The company markets a family of intraluminal catheter-

directed ultrasound imaging catheters and systems for use in coronary arteries and heart chambers, as well as certain peripheral vessels. The iLab Ultrasound Imaging System is available in the U.S., Japan, and other international markets. This system improves the diagnosis and treatment of blocked vessels and heart disorders.

Peripheral Interventions

The company sells various products designed to treat patients with peripheral disease (disease which appears in blood vessels other than in the heart and in the biliary tree), including a line of medical devices used in percutaneous transluminal angioplasty and peripheral vascular stenting. The company's peripheral product offerings include vascular access products, balloon catheters, stents and peripheral vascular catheters, wires, and accessories, as well as products used for peripheral embolization procedures. The

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
