Such information creates your awareness about principal trends of Bravo Gold Corp. business.

About Bravo Gold Corp.

Bravo Venture Group Inc., an exploration stage company, engages in the acquisition, exploration, and development of mineral properties. The company has interests in various mineral properties in Nevada, British Columbia and Alaska.

Properties

HOMESTAKE RIDGE PROPERTY – BRITISH COLUMBIA

Homestake Ridge is a prospective gold project located in the Skeena Mining Division of British Columbia and includes certain unpatented mineral claims (TCL claims) and certain patented Crown Granted claims (Crown Grant claims).

TCL claims: Pursuant to an agreement with Teck Cominco Limited (TCL), the company owns 100% interest in the 14 TCL claims on the Homestake Ridge property.

Crown Grants Claims: The company owns 100% interest in certain patented mineral claims (Crown Grant claims), contiguous to the mineral claims governed by the terms of the TCL agreement.

BATTLE MOUNTAIN PROPERTIES – NEVADA

The company has the right to earn a 100% interest in various properties located within the Battle Mountain-Eureka gold trend in Nevada, also referred to as the 'Cortez' gold trend. The company owns six projects: Three Bar, South Lone Mountain, South Gold Bar, Pete Hanson, North Lone Mountain, and Gabel Canyon properties.

SF Claims: Pursuant to an agreement, the company owns 100% interest in certain mineral claims, named SF claims, located in Eureka County.

Mountain Boy Parcel (Signal, Temple and Shiva projects): Pursuant to an agreement, the company owns 100% undivided interest in a group of claims in the northwestern portion of the Eureka Mining District, Nevada.

Granite Mountain Project: Pursuant to an agreement, the company leased certain patented fee land called the Granite Mountain Project in Lander County, Nevada.

Half Ounce Claims: The company entered into an option agreement to acquire the Half-Ounce claims, consisting of certain lode claims located in the Battle Mountain-Eureka trend, within the Trend area of interest. The company may earn a 100% interest in the claims.

Three Bar Claims: The company has the right to acquire a 100% interest in the property.

WOEWODSKI PROPERTY – ALASKA

The company, pursuant to an agreement with Olympic Resources Group, LLC (Olympic), owns 100% interest in certain federal and certain state mineral claims located in the Petersburg Recording District of Alaska, on Woewodski Island.

FOSSIE CLAIM – BRITISH COLUMBIA

The company owns 100% interest in the Fossie claim located in Skeena Mining Division, British Columbia, Canada.

Significant Events

Option and earn-in agreement – Shoshone Pediment Claims: In April 2009, the

company entered into an agreement with Baker Hughes, whereby Baker Hughes acquired an option for the barite rights at the property expiring in 6 years from the date of the agreement. The Shoshone Pediment project is located in Lander County, Nevada.

The company has entered into two agreements with two separate arms-length private vendors to purchase additional mineral claims at its Homestake Ridge property located in NW British Columbia.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
