The Bravura Solutions Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Bravura Solutions Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Bravura Solutions Limited business.

About Bravura Solutions Limited

Bravura Solutions Limited provides superannuation and pension, life insurance, investment, and portfolio administration software products, and business and strategic consulting services worldwide.

The company offers Rufus, a transfer agency solution for the support of retail and institutional transfer agency administration. It is fully multi-lingual and multi-currency with integrated FX processing. The solution supports the transfer agency business of management companies across the United Kingdom, Luxembourg, Ireland, and Channel Island domiciles.

The company offers superannuation and pension solutions, including TalisPension and TalisGroupPension retirement savings solutions. It also provides TalisLife, a life insurance solution, which enables insurance policyholders to view investments in managed funds and offers the option of an online presence; and TalisTrust, an enterprise level technology platform that provides a suite of business services delivering administration capabilities across managed investment products.

The company offers a wrap solution, which enables to consolidate existing product suite

onto a single integrated platform; and Garradin, a multi-currency investment management system with integrated asset management, registry and tax management functions. It is a modular solution that can be deployed across multiple sectors, including retail wealth management platforms, such as wraps, master trusts and managed accounts, wholesale investment management, registry and mutual funds, and custody.

The company's STP financial messaging platform, Babel, is used by various financial institutions. It automates external linkage to various markets and counterparties, directly or through major platforms. Its STP financial messaging solution includes a set of modules that manage different messages and transactions (orders management, custody, statements, reconciliation, settlement and payments), external connectivity to particular markets and platforms, (Allfunds Bank, EMX, Euroclear, FundSettle, NSCC and Vestima+), as well as specific message protocols (FIX and all SWIFT standards).

The company's eBusiness offering can provide distributed users with enquiry and transactional access to account information held on its platforms and those on third party solutions. It offers a range of professional services designed to define and deliver enhanced capabilities to its clients. Its professional services include BPO Partnering, consulting, data migration, implementation, software development, support, and training.

Markets

The company provides software and support to approximately 180 financial institutions with a range of corporate clients in Australia, the United Kingdom, New Zealand, Hong Kong, South Africa, and Europe.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
