The Breakwater Resources Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Breakwater Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Breakwater Resources Ltd. business.

About Breakwater Resources Ltd.

Breakwater Resources Ltd., a mineral resource company, engages in mining base metal deposits in the Americas. The company owns or has the exploration rights to base metal and gold exploration properties in Canada, Chile, Honduras and Tunisia. The company is engaged in the acquisition, exploration and development of base and precious metals deposits internationally.

The company's principal product is zinc concentrate. It also produces copper, lead and gold concentrates and silver as a by-product. The company sells concentrates to smelters located in Canada, Europe, Asia and South America and to resellers who sell the concentrates to smelters throughout the world. The company sells a portion of the concentrate it produces under long-term supply agreements.

Operating Mines

MOCHITO MINE: The company owns and operates the Mochito zinc/lead/silver mine located in Honduras through American Pacific Honduras S.A. de C.V. The Mochito mine is located in northwest Honduras, near the town of Las Vegas, approximately 88 kilometres southwest of San Pedro Sula and 220 kilometres northwest of the capital city, Tegucigalpa. The Mochito mine consists of an underground zinc/lead/silver mine

and a 2,300 tonne per day concentrator. The Mochito property includes 53 exploitation concessions totaling 10,835 hectares of mineral rights.

TOQUI MINE: The company owns and operates the Toqui zinc/lead/gold/silver mine in Chile through its wholly-owned subsidiary, Sociedad Contractual Minera El Toqui. The Toqui mine is located in Chile's Region XI, approximately 1,350 kilometres south of Santiago. The site is situated approximately 120 kilometres by road north of the regional capital, Coyhaique, and an equal distance northeast from the port town of Chacabuco. The Toqui mine property is held through exploration concessions totaling 28,000 hectares and exploitation concessions totaling 7,572 hectares. In addition, there are 55,720 hectares of various other land holdings in the Toqui district for a total land holding of 91,292 hectares.

MYRA FALLS MINE: The company owns and operates, through its subsidiary NVI Mining Ltd., the Myra Falls zinc/copper/lead/gold/silver mine located near Campbell River, British Columbia. The Myra Falls mine is located in Strathcona Provincial Park in central Vancouver Island, British Columbia. The Myra Falls mine facilities include an underground mine and a conventional mill which produces separate zinc and copper concentrates. The mine property covers approximately 2,210 hectares held under mining leases, approximately 318 hectares held under freehold title to minerals and 1,110 hectares held under two post mining claims.

LANGLOIS MINE: The Langlois mine is located in northwestern Québec, approximately 48 kilometers northeast of the town of Lebel-Sur-Quévillon and 213 kilometers northeast of Val d'Or. Lebel-Sur-Quévillon has a population of approximately 3,500. The property is held through a 134.27 hectare mining lease.

Other Properties of Potential Interest

Metco Acquisition: Following the purchase of Metco in April, 2008, the company increased its land position in the province of Québec. In Lebel-sur-Quévillon, the company has 100% interest in the former Metco joint venture on properties extending over 15 kilometers (186 claims, 3,402 hectares) in the same deformation corridor as the company's current deposits. The company has 100% of the Orphée deposit where a NI 43-101 resource was reported by Metco. The Company also owns 100% interest in three base metal properties (89 claims, 1,815 hectares) in Rouyn-Noranda and one gold property (36 claims, 735 hectares) in Chibougamau. In the Gaspé Peninsula, the Company has a joint venture with Regal Consolidated Ventures Ltd. on the Mont de l'Observation copper property (399 claims, 22,283 hectares).

Coulon Project: In December 2008, the company sold its 50% interest in the Coulon joint venture property to Virginia.

Trieste Project: The Trieste property is located within the La Grande Archean volcano-sedimentary belt and covers an assemblage of mafic to felsic volcanics, iron formations, and a synvolcanic intrusion.

Gayot Project: The company has the option to earn a 50% interest in the property. The Gayot property consists of 116 claims covering 4,947 hectares and three mining exploration permits covering a surface area of 15,437 hectares.

Kaminak Project: In early 2009, the Company sold its 50% interest in the joint venture to Kaminak.

History

Breakwater Resources Ltd. was founded in 1979. The company was formerly known as Gambier Exploration Ltd. and changed its name to Breakwater Resources Ltd. in June 1981.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
