Abstracts

Brigus Gold Corp Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Brigus Gold Corp and its competitors. This provides our Clients with a clear understanding of Brigus Gold Corp position in the Industry.

The report contains detailed information about Brigus Gold Corp that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Brigus Gold Corp. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Brigus Gold Corp financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Brigus Gold Corp competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Brigus Gold Corp business.

About Brigus Gold Corp

Brigus Gold Corp. engages in the mining, extracting, and processing of gold.

Mineral Properties

Black Fox

The Black Fox property was formerly known as the Glimmer mine. Black Fox consists of two properties: a mine and a mill. The Black Fox mine is located approximately seven miles east of Matheson, Ontario, Canada. The Black Fox mill is located approximately 12 miles west of Matheson. The Black Fox mine consists of 4,529 acres. The property includes property known as Pike River and Grey Fox, which are contiguous to the Black Fox mine property boundaries and stretch two miles southeast of the Black Fox open pit mine.

Exploration Stage Properties

Grey Fox: The Grey Fox Project sits along the Destor Porcupine Fault Zone (DPFZ) in the Timmins Mining District of Ontario and is located approximately 3.5 kilometers southeast of the Black Fox mine. The 2009 drilling program commenced in August of

2009, and 53 holes had been completed.

Pike River: During 2009, the company completed the acquisition of the Pike River property from Newmont Canada Corporation (Newmont). The Pike River property is located in the Township of Hislop, Ontario, Canada and is contiguous to the south-east boundary of Apollo's Black Fox mine and the north-west boundary of Apollo's Grey Fox property. This property consists of the surface and mineral rights to approximately 1,145 acres consisting of parcels 1735 LC, 1726 LC, 23687 SEC, 23777 SEC, 3852 SEC and 11125 SEC. With the acquisition of Pike River, the company controls a 17 square kilometer land package (Black Fox, Grey Fox and Pike River). The 2009 drilling program included the first six holes drilled on Pike River to test the northern extension of mineralization from the adjoining Grey Fox property.

Huizopa: The company owns Mexican subsidiaries which own 100% of the concessions at the Huizopa exploration project. The Huizopa project is located in the northern part of the Sierra Madres Mountains in the state of Chihuahua, Mexico, near the border with the State of Sonora, and encompasses a block of mining concession claims of approximately 170 sq. km.

Significant Events

On August 12, 2010, Everton Resources Inc. and Brigus Gold Corp. announced that they have amended their joint venture option agreements relating to 3 exploration projects in the Dominican Republic. Everton and Brigus Gold each hold 50% interest in the Ampliacion Pueblo Viejo and the Loma El Mate projects, which are being managed by Everton and are contiguous with Barrick's and Goldcorp's Pueblo Viejo gold deposit. Under the amended agreements, Everton has the right to earn an additional 20% interest in each of the projects.

History

The company was founded in 1936. It was formerly known as Apollo Gold Corporation and changed its name to Brigus Gold Corp. in June 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same

price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
