term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Bristow Group, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Bristow Group, Inc. business.

About Bristow Group, Inc.

Bristow Group, Inc. is a provider of helicopter services to the offshore energy industry worldwide. The company has significant operations in most major offshore oil and gas producing regions of the world, including the North Sea, the U.S. Gulf of Mexico, Nigeria, Australia and Latin America.

The company conducts its business in one segment: Helicopter Services. The Helicopter Services segment operations are conducted primarily through five business units: North America, Europe, West Africa, Australia, and Other International.

The company provides helicopter services to a base of major integrated, national and independent oil and gas companies. The company's customers charter its helicopters primarily to transport personnel from onshore bases to offshore drilling rigs, platforms and other installations. To a lesser extent, customers also charter its helicopters to transport time-sensitive equipment to these offshore locations. In addition to its primary Helicopter Services operations, the company also operates a training business unit, Bristow Academy, and provides technical services to customers in the U.S. and U.K.

North America

The company operates its North America business unit from seven operating facilities in the U.S. Gulf of Mexico and three operating facilities in Alaska. The company is one of the suppliers of helicopter services in the U.S. Gulf of Mexico. The company's customer base in this business unit consists of mostly international, independent and major integrated oil and gas companies. The company's principal work in Alaska utilizes five aircraft that provide daily support to the Trans-Alaska pipeline, along with providing small and medium twin engine contract and charter service to exploration, development and production activities on the North Slope and in the Cook Inlet.

Europe

The company operates its Europe business unit from three bases in the U.K., one base in Holland and three bases in Norway. The company's Europe operations are managed out of its facilities in Aberdeen, Scotland. The company deploys the majority of the large aircraft in its consolidated fleet in this region. The company's customer base in this business unit consists primarily of major integrated and independent oil and gas companies. In addition to its oil and gas helicopter services, the company is a civil supplier of search and rescue services to the Netherlands Oil and Gas Exploration and Production Association.

West Africa

As of March 31, 2010, all of the company's aircraft in its West Africa business unit operate in Nigeria, where the company is the provider of helicopter services to the oil and gas industry. The company deploys a combination of small, medium and large aircraft in Nigeria and service a customer base comprised mostly of major integrated oil and gas companies. The company has 10 operational bases, with the bases located in Escravos, Warri, Port Harcourt and Lagos.

Australia

The company is the provider of helicopter services to the oil and gas industry in Australia, where the company has eight bases located in western Australia, two in Victoria and one in Queensland. These operations are managed from its Australian head office facility in Perth, western Australia. The company also provides airport management services on Barrow Island in western Australia. The company's client base in Australia consists primarily of major integrated oil and gas companies. The company also provides engineering support to the Republic of Singapore Air Force's fleet of helicopters at their base in Oakey, Queensland.

Other International

The company conducts its Other International operations in Brazil, Egypt, India, Malaysia, Mexico, Russia, Trinidad, and Turkmenistan. As of March 31, 2010, the company and its unconsolidated affiliates operated a mixture of small, medium, and large aircraft in these markets. The company has a total of 204 aircraft in this business unit, including 141 aircraft of unconsolidated affiliates. The following is a description of operations in its Other International business unit, as of March 31, 2010.

Brazil – The company owns a 42.5% interest Líder, the provider o

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
