The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Broadcast International Inc. business.

About Broadcast International Inc.

Broadcast International, Inc. engages in the installation, management, and support of private communication networks for large organizations in the United States. The company's enterprise clients use these networks to deliver training programs, product announcements, entertainment, and other communications to their employees and customers.

The company uses various delivery technologies, including satellite, Internet streaming and WiFi, depending on the specific needs and applications of its clients. It sells proprietary network products in connection with the services it provides. It also offers audio and video production services for its clients. The company owns proprietary video compression technology that it trademarked as CodecSys.

The company develops the CodecSys technology for various applications, including Internet streaming, cable and satellite broadcasting, IPTV and transmitting video content to cellular phones, and other hand-held electronic devices.

Products and Services

Internal Business Applications: The company services are used to deliver briefings from the CEO or other management; launch new products or services; present new marketing campaigns; train employees; announce significant changes or implement new policies and procedures; and respond to crisis situations.

External Business Applications: The company services are used to display advertising in public areas utilizing digital signage; make promotional presentations to prospective customers or recruits; provide product/service training to customers; train and communicate with sales agents, dealers, VARs, franchisees, and association members; sponsor satellite media tours; and provide video/audio news releases.

Network-Based Services: The company utilizes satellite technology for various business training and communication applications. Its products and services that attracts companies in need of a satellite solution include network design and engineering; equipment and installation; network management; help desk services; on-site maintenance and service; full-time or occasional satellite transponder purchases (broadcast time); and uplink facilities or remote SNG uplink trucks.

Streamed Video Hosting Services: The company's services include server space; Internet connection; secure access; links from client's Web site; customized link pages and media viewers; testing or self-checks; interactive discussion threads; participation/performance reports for managers/administrators; notification of participants via email; pay-per-view or other e-commerce applications; live events; and technical support.

Production and Content Development Services: The company operates service video and audio production studios. Its support services include in-studio or on-location video/audio production; editing/post-production; instructional design; video/audio encoding for Internet delivery; conversion of text or PowerPoint to HTML; alternative language conversion; and access to video training content.

New Products and Services

The company has licensed its CodecSys technology to a Japanese software engineering firm which has developed a single channel video encoder for use by customers who are not traditional broadcasters, such as customers with sporting venues who desire to broadcast real time events. It is also developing the CodecSys technology for various applications, including Internet streaming, satellite encoding, and transmitting video content to cellular phones and other hand-held electronic devices.

Competition

In the satellite network and services segment, the company competes with Convergent Media Systems, Globecast, IBM, Cisco, and TeleSat Canada. With respect to video conferencing, it competes with Sony, Polycom, and Tandberg.

History

Broadcast International, Inc. was founded in 1999.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
