Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Buckeye Partners LP business.

About Buckeye Partners LP

Buckeye Partners, L.P. operates an independent refined petroleum products pipeline system in the United States. The company's pipeline in terms of volumes delivered with approximately 5,400 miles of pipeline and 67 active products terminals that provide aggregate storage capacity of approximately 27.2 million barrels. In addition, Buckeye operates and maintains approximately 2,400 miles of other pipelines under agreements with major oil and chemical companies.

The company owns and operates a major natural gas storage facility in northern California which provides approximately 40 billion cubic feet (Bcf) of total natural gas storage capacity (including pad gas), and are a wholesale distributor of refined petroleum products in the United States in areas also served by its pipelines and terminals.

Subsidiaries

The company conducts all of its operations through operating subsidiaries, which are referred to as the 'Operating Subsidiaries':

Buckeye Pipe Line Company, L.P. (Buckeye Pipe Line), which owns an approximately

2,643-mile refined petroleum products pipeline system serving major population centers in eight states. It is the primary jet fuel transporter to John F. Kennedy International Airport (JFK Airport), LaGuardia Airport, and Newark Liberty International Airport (Newark Airport).

Laurel Pipe Line Company, L.P. (Laurel), which owns an approximately 345-mile refined petroleum products pipeline connecting five Philadelphia area refineries to 10 delivery points across Pennsylvania.

Wood River Pipe Lines LLC (Wood River), which owns six refined petroleum products pipelines with aggregate mileage of approximately 1,287 miles located in Illinois, Indiana, Missouri and Ohio. Wood River includes two pipelines that the company acquired in 2009.

Buckeye Pipe Line Transportation LLC (BPL Transportation), which owns a refined petroleum products pipeline system with aggregate mileage of approximately 478 miles located in New Jersey, New York, and Pennsylvania.

Everglades Pipe Line Company, L.P. (Everglades), which owns an approximately 37-mile refined petroleum products pipeline connecting Port Everglades, Florida to Ft. Lauderdale-Hollywood International Airport and Miami International Airport. It is the primary jet fuel transporter to Miami International Airport.

Buckeye Pipe Line Holdings, L.P. (BPH), which owns (or in certain instances leases from other Operating Subsidiaries) 62 refined petroleum and other products terminals with aggregate storage capacity of approximately 26.2 million barrels and 574 miles of pipelines in the Midwest and West Coast. BPH's terminal holdings include three terminals that the company acquired 2009. BPH operates, through its subsidiaries, terminals and pipelines for third parties. BPH also holds non controlling stock interests in two Midwest refined petroleum products pipelines and a natural gas liquids (NGLs) pipeline system.

Buckeye Gas Storage LLC (Buckeye Gas), which, through its subsidiary Lodi Gas Storage, L.L.C (Lodi Gas), owns a natural gas storage facility in northern California, which provides approximately 40 Bcf of total natural gas storage capacity (including pad gas).

Buckeye Energy Holdings LLC (Buckeye Energy), which, through its subsidiary Buckeye Energy Services LLC, markets refined petroleum products in areas served by

Buckeye's pipelines and terminals and also owns five refined petroleum product terminals with aggregate storage capacity of 1.0 million barrels and other distribution assets located in northeastern and central Pennsylvania.

Business Activities

Pipeline Operations segment

The Pipeline Operations segment owns and operates approximately 5,400 miles of pipeline that are located primarily in the Northeastern and upper Midwestern portions of the United States and services approximately 100 delivery locations. This segment transports refined petroleum products, including gasoline, jet fuel, diesel fuel, heating oil, kerosene and natural gas liquids, from major supply sources to terminals and airports located within end-use markets. The pipelines within this segment also transport other refined products, such as propane and b

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
