Abstracts

Buckeye Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Buckeye Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Buckeye Technologies Inc. position in the [Paper and Forest Products Industry](#).

The report contains detailed information about Buckeye Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Buckeye Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Buckeye Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Buckeye Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Buckeye Technologies Inc. business.

About Buckeye Technologies Inc.

Buckeye Technologies Inc. produces value-added cellulose-based specialty products used in various applications, including disposable diapers, personal hygiene products, engine air and oil filters, food casings, rayon filament, acetate plastics, thickeners, and papers.

Products

The company's product lines are grouped into four categories: chemical cellulose, customized fibers, fluff pulp, and nonwoven materials. It manages these products with in two segments, Specialty Fibers and Nonwoven Materials.

The chemical cellulose and customized fibers are derived from wood and cotton cellulose materials using wetlaid technologies. Fluff pulps are derived from wood using wetlaid technology. Wetlaid technologies encompass cellulose manufacturing processes in which fibers are deposited using water. Airlaid nonwoven materials are derived from wood pulps, synthetic fibers and other materials using airlaid technology. Airlaid technology utilizes air as a depositing medium for fibers.

Specialty Fibers Segment

In Specialty Fibers segment, the company offers chemical cellulose, customized fibers, and fluff pulp.

The company's chemical cellulose products include food casings, rayon industrial cord, rayon staple fiber, cellulose ethers, wood acetate, and cotton acetate. Its chemical cellulose products are used in various applications, including hot dog and sausage casings; tires and hose reinforcement; textiles; personal care products, low fat dairy products, pharmaceuticals, and construction materials; cigarette filters; and liquid crystal display film for computers and television screens and plastic applications.

The company's customized fiber products include filters, specialty cotton papers, cosmetic cotton, and buckeye UltraFiber 500. These products are used in various applications, including automotive, laboratory, and industrial filters; personal stationery, premium letterhead, and currency; cotton balls and cotton swabs; and concrete.

The company also offers fluff pulp, which is used in disposable diapers, feminine hygiene products, and adult incontinence products.

Nonwoven Materials

The Nonwoven Materials Segment includes airlaid nonwovens, which are used in feminine hygiene products, specialty wipes and mops, tablecloths, napkins, placemats, incontinence products, and food pads.

Markets

The company offers its products in North America, Europe, Asia, and South America. It maintains sales offices in the United States, Europe, and China.

Competition

The company's major competitors in the chemical cellulose and customized fiber market include Rayonier Inc., Borregaard, Sateri International Group (Sateri), Neucel Specialty Cellulose Ltd., Sappi Saiccor, Tembec Inc., and Archer Daniels Midland Company. Its major fluff pulp competitors include AbitibiBowater Inc., International Paper Company, GP Cellulose, LLC, Rayonier, Weyerhaeuser Corp., and Domtar Corp. The company's major nonwovens competitors include Ahlstrom Oyi, Fiberweb Plc, P.H. Glatfelter

Company, Duni AB, GP Cellulose, LLC, Kimberly-Clark Corporation, and Polymer Group, Inc.

History

Buckeye Technologies Inc. was founded in 1992.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
