## Abstracts

Buzzi Unicem SpA Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Buzzi Unicem SpA and its competitors. This provides our Clients with a clear understanding of Buzzi Unicem SpA position in the [Building Products and Construction Materials](#) Industry.

The report contains detailed information about Buzzi Unicem SpA that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Buzzi Unicem SpA. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Buzzi Unicem SpA financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Buzzi Unicem SpA competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Buzzi Unicem SpA business.

## **About Buzzi Unicem SpA**

Buzzi Unicem SpA, through its subsidiaries and associates, engages in the production and sale of cement, ready-mix, and aggregates. The company manufactures plastic binders for plaster and masonry works, expanded clay, light pre-mixes, insulating blocks, and admixtures for concrete and cement. It acquired a stake in the Italian producer of expanded clay, Laterlite S.p.A. The company operates in Italy, the Americas, Europe, and Mexico.

The company offers Calinto, which is a plastic binder for plaster and masonry and it is included in the hydraulic plastic masonry cement category. A ready-to-use product, Calinto replaces mixture mortars (impure mortars) made of cements, hydraulics and air lines.

The company also offers special products, such as

**ProntaPresa:** ProntaPresa is a special, quick setting, hydraulic binder. Besides the typical setting speed of the product group it belongs to, it has a final gray color that eliminates the unaesthetic spots on the repaired product. It is used for sealing, fixing dowels and for repairs. The hardened mixes are not affected by humidity and do not swell.

**Rocket 200:** Rocket 200 is a pre-mixed, ready-to-use material for very-fast-hardening mortars and grouts, to be used in the partial remaking of roads, airport runways, railroads or tram lanes that must be re-opened to traffic in a few hours. It is a mortar for road repairs.

**Ecospritz: Bulk Ecospritz** is a special sulfate-resisting binder based on the use of IV/A 42,5 pozzolana cement. It is used for thin structural overlayers (tunnels, pipes, securing unsteady walls, and tanks).

**Ecospritz Gunite:** Ecospritz Gunite is a dry mortar mix for sprayed mortars and shotcrete. Ecospritz Gunite is used for thin structural overlayers (tunnels, pipes, securing unsteady walls, and tanks).

**Ecospritz Gunite WLT:** Ecospritz Gunite WLT is a fiber-reinforced and shrinkage-compensated dry mortar mix. Ecospritz Gunite WLT is used for structural overlayers, such as tunnels, pipes, securing unsteady walls and tanks; and it is placed by means of plaster-sprayer machines or standard shotcrete technology.

**Jet Cement** is a special pozzolana-based hydraulic binder.

**Eureka-T:** Eureka-T is a special cement-based binder that - after being mixed with water and proper-grained aggregates - allows the making of quick-drying slab floors, which are suitable for the laying of any kind of flooring material (even wood and carpeting), indoors and outdoors, since it is not affected by water after it has hardened.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
