profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes CACI International Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of CACI International Inc. business.

About CACI International Inc.

CACI International Inc. provides professional services and information technology (IT) solutions. The company's services are primarily targeted to the areas of defense, intelligence, homeland security, and IT modernization.

Domestic Operations

The company's domestic operations are conducted through subsidiaries and joint ventures which it controls. It provides professional services and information technology solutions to its domestic clients through its service offerings:

Enterprise IT and Network Services: The company supports its clients' critical networked operational missions by providing enterprise information technology services for the design, establishment, management, security, and operations of client infrastructure.

Data, Information, and Knowledge Management Services: The company delivers various solutions and services that automate the knowledge management life cycle from data capture through information analysis and understanding. It provides commercially-

based products, custom solutions development, and operations and maintenance services that facilitate information sharing. Its information technology solutions are complemented by a suite of analytical expertise support offerings for its U.S. government Intelligence Community, Department of Defense (DoD), Department of Justice (DoJ), and Homeland Security customers.

Business System Solutions: The company provides solutions that address various requirements in the financial, procurement, human resources, supply chain, and other business domains. Its offerings include services, consulting, and software development/integration that support the life cycle of commercial technology implementation from blueprint through application sustainment.

Logistics and Material Readiness Services: The company offers a suite of solutions and service offerings that plan for, implement, and control the flow and storage of goods, services, and information in support of U.S. government agencies. It develops and manages logistics information systems, specialized simulation and modeling toolsets, and provides logistics engineering services. The company's operational capabilities span the supply chain, including advance logistics planning, demand forecasting, total asset visibility (including the use of Radio Frequency Identification technology), and life cycle support for weapons systems.

C4ISR Services: The company provides rapid response services in support of military missions in a coordinated and controlled operational setting. It supports the military efforts to ensure delivery and sustainment of integrated, enterprise-wide, command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) programs. It integrates sensors, mission applications, and systems that connect with DoD data networks.

Cyber Security: The company solutions and services support the life cycle of preparing for, protecting against, detecting, reacting to and actively responding to a range of cyber threats.

Integrated Security and Intelligence Solutions: The company assists clients in developing integrated solutions that close gaps between security, intelligence, and law enforcement to address complex threats to its national security.

Program Management and System Engineering and Technical Assistance (SETA) Services: The company supports U.S. government program executive offices and program management offices via subject matter experts and technical management

processes that optimize program resources. This includes translating operational requirements into configured systems, integrating technical inputs, characterizing and managing risk, transitioning technology into program efforts, and verifying that designs meet operational needs. Additionally, it provides SETA and advisory and assistance services that include contract and acquisition management, operations support, architecture and system engineering services, project and portfolio management, strategy and policy support, and complex trade analyses.

International Operations

The company's international operations are conducted primarily through its operating subsidiary in Europe, CACI Limited. CACI Limited operates primarily in support of its data, information, and knowledge management services; business systems solutions; and enterprise IT and network services lines of business.

The company's international service offerings focus primarily on planning, designing, implementing, and managing solutions that resolve specific technical or business needs for commercial and government clients in the telecommunications, education, financial services, healthcare services, and transportation sectors. Its international operations also concentrate on combining data and technology in software products and services that provide strategic information on customers, buying patterns and market trends for clients who are engaged in retail sales of consumer products, direct marketing campaigns, franchise or branch site location projects, and similar endeavors.

Acquisitions

In February 2010, the company acquired the outstanding stock of SystemWare Incorporated, which provides signal acquisition and analysis systems for cyber security and counterintelligence application.

Customers

The company serves clients in the U.S. federal government and commercial markets, primarily throughout North America and internationally on behalf of U.S. customers, as well as in the United Kingdom. Other customers include state and local governments, commercial enterprises, and agencies of foreign governments.

History

CACI International Inc. was founded in 1962.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
