The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Cagle's Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cagle's Inc. business.

About Cagle's Inc.

Cagle's, Inc. engages in the production, marketing, and distribution of fresh and frozen poultry products in the southeastern United States.

The company's vertically integrated operations consist of breeding, hatching, and growing of chickens; feed milling; processing; further processing; and marketing operations. It processes approximately 2.23 million birds per week in its 2 processing plants. The feed for flocks is produced in a feed mill owned by the company.

The company's products are sold to national and regional independent and chain supermarkets, food distributors, food processing companies, national fast-food chains, and institutional users, such as restaurants, schools, and distributors.

Production and Facilities

Breeding and Hatching: The company supplies its broiler chicks by producing hatching eggs from breeder flocks owned by it. These breeder flocks are maintained on 40 contract grower farms. In addition, the replacement breeder pullets are maintained on 20 contract grower farms where the breeders are reared from 1 day old to approximately 21 weeks old and then moved to the breeder farm where they begin to produce eggs at approximately 25 weeks of age. These farms are located in north

Georgia and Tennessee. The company owns a hatchery located in Dalton, Georgia, at which eggs are incubated and hatched. The hatchery has an aggregate capacity of 2.9 million eggs per week.

Grow-Out: The company places its broiler chicks on approximately 150 contract grower farms. The independent contract growers provide the housing, equipment, utilities, and labor to grow the baby chicks to market age, which varies from five to six weeks, depending on the market for which they are intended. The company supplies the baby chicks, the feed, and veterinary and technical services. The contract farms are located in Georgia and Alabama.

Feed Mill: The company owns a feed mill in Rockmart, Georgia, which has production capacity of approximately 15,000 tons per week.

Processing: As the broilers reach the desired processing weight, they are removed from the houses and transported by company trucks to a processing plant. The processing plants are located in Pine Mountain Valley, Georgia; and Collinsville, Alabama. The Collinsville plant can process up to 18,000 birds per hour. The Pine Mountain plant has the capacity to process 10,920 birds per hour.

Further Processing and Deboning: The company focuses on marketing majority of its product as value-added product consisting of marinated rotisserie deli, fast-food cuts, boneless portioned breast, marinated and breaded parts, individual quick frozen parts, and other convenience-type products. Further processing is conducted at the Collinsville, Alabama, and Pine Mountain Valley, Georgia, plants.

Freezer Storage: The company's facilities are located in Atlanta, Georgia; Collinsville, Alabama; and Pine Mountain Valley, Georgia. Its facilities have freezer storage facilities with aggregate capacity of approximately 14.0 pounds of frozen product.

Local Distribution: As an extension of the company's sales division, local distribution is operated from warehouse facilities in Atlanta, Georgia, and Collinsville, Alabama, and are designed to provide storage and delivery service for those customers.

History

Cagle's, Inc. was founded in 1945.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
