The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Calais Resources Inc. business.

About Calais Resources Inc.

Calais Resources, Inc. (Calais or the Company) through its subsidiaries engages in the acquisition and exploration of mineral interests. The Company's primary property is the Caribou prospect located in Nederland, Colorado. It also has interests in exploration prospects in Nevada and Panama.

Subsidiaries

The Company's subsidiaries include Calais International, Inc.; Calais Resources Nevada, Inc.; and Calais Resources Colorado, Inc.

Properties

Caribou prospect, Colorado, USA: Gold/Silver Exploration

The Caribou prospect includes the Cross Gold Mine, the Potosi Mine and other district prospects. The prospect is on the east flank of the Front Range Mountains, approximately 25 miles west of Boulder, Colorado. The prospect area encompasses claims with additional Federal claims on public lands north and west of the Cross Mine. Gold and silver mineralization occurs in a broad, west-northwest trending zone that

includes the Cross Mine and extends about 2,500 feet on the prospect.

The Caribou Consolidated District, located near Nederland, Colorado, is a 3.5 square mile consolidated precious metals district. As of May 31, 2004, the Company had completed 150,000 feet of core drilling. The property the Company own includes 128 patented and 105 unpatented mining claims.

In March 2004, Mr. Harvey and his affiliates entered into a settlement agreement with the Company which, among other things, included a precise definition of Calais' right (which expires August 31, 2011) to repurchase the interest of Aardvark Agencies, Inc. (AAI) in the Caribou prospect.

Manhattan Prospect; Nevada, USA: Gold Exploration

The Manhattan prospect is located around the old mining town of Manhattan, Nevada, U.S.A. Manhattan is 15 miles southeast of Round Mountain, Nevada, located on Highway 376, 20 miles from Carvers, Nevada, and 43 miles from Tonopah, Nevada. The prospect covers approximately 4,600 acres of patented and unpatented Bureau of Land Management (BLM) and U.S. Forest Service (USFS) land.

The Company entered into an agreement with Nevada Manhattan Mining Incorporated to settle and purchase its interest in the property. As of May 31, 2004, the Company was not intending to explore this property until the title situation has been resolved.

Panama Prospect: Gold Exploration

The Panamanian concession consists of approximately 24,000 hectares, and includes river marine placer, off shore marine placer, and hard rock prospects located in the eastern Veraguas district of Panama.

The Company entered into a 'Purchase Option Agreement' with Panama Mining of Golden Cycle of Panama Incorporated and Golden Cycle of Panama, Inc. Panama Mining of Golden Cycle has an agreement with Golden Cycle of Panama for 3,000 hectares.

History

Calais Resources, Inc. was incorporated in the year 1986.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
