Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Caledon Resources plc business.

About Caledon Resources plc

Caledon Resources Plc (the company) is a China-focused gold explorer, possessing an attractive portfolio of advanced stage exploration projects in Southern China. The company has exploration activities on five advanced stage gold projects: Hengxian, Longtoushan, Gaolong, Badu and Mojiang.

Hengxian Project

The Company, through its wholly owned subsidiary Blackwatch Resources, has signed an agreement with Guangxi Taifu Gold and Minerals Development Ltd Co (Taifu) covering granted mining and exploration tenements at Hengxian, Guangxi Province, PRC.

Under the terms of the agreement, Caledon, through its wholly owned subsidiary Blackwatch Resources, has the right to earn a 70% equity stake in the combined mining and exploration project by conducting exploration over a three year period. At Hengxian, gold is being mined in a north-east trending zone measuring up to 3 kilometers long and up to 800 meters wide.

Longtoushan Gold Mine

Under the terms of the agreement with the Longtoushan Gold Company, the Company, through its wholly owned subsidiary Blackwatch Resources, has the right to earn an 81% equity stake in the project. The project and mine site area is situated 15 kilometers from the regional city of Guigang.

Gaolong Gold Mine

Blackwatch has signed a Letter of Intent (LOI) with the Guangxi Tianlin Gaolong Gold Mine Ltd Co (GTGGML). Under the terms of the LOI, Blackwatch can earn an 81% equity stake in the Gaolong and Badu gold projects, as well as a further 300 square kilometers of promising exploration ground in the “Golden Triangle” area of northwest Guangxi. The Gaolong project and mine site area is situated 60 kilometers north west of the regional town of Tianlin in northwestern Guangxi.

The Badu Gold Project

Blackwatch has signed a LOI with the Guangxi Tianlin Gaolong Gold Mine Ltd Co (GTGGML). Under the terms of the LOI, Blackwatch can earn an 81% equity stake in the Gaolong and Badu gold projects, as well as a further 300 square kilometers of promising exploration ground in the “Golden Triangle” area of northwest Guangxi.

Badu Gold Mine – Small scale mining is in progress at the Badu Mine, situated 12 kilometers North East of the Gaolong mine.

Mojiang Gold Mine

Blackwatch has signed a LOI with the Mojiang Mining Limited Company (MMLC). Under the terms of the LOI, Blackwatch can earn a 70% equity stake in the Mojiang mine concession (7.2 km²) and new tenements within Mojiang County, as well as a 90% interest on exploration ground to be acquired in defined counties in southern Yunnan Province. The Mojiang project and mine site area is situated 240kms SW of Kunming the capital of Yunnan in south-western Yunna.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
