The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Canaccord Financial Inc business.

About Canaccord Financial Inc

Canaccord Capital, Inc. operates as an independent full service investment dealer. The Company offers complementary investment products, brokerage services and investment banking services to Canaccord's retail, institutional and corporate clients.

Canaccord has substantial operations in each of the two principal segments of the securities industry: Private Client Services and Global Capital Markets.

Private Client Services

Canaccord's private clients are primarily individuals and high net worth accounts. Canaccord provides financial services and investment products to its private clients, including both third party and proprietary products.

Global Capital Markets

Canaccord's Global Capital Markets group operates as an integrated unit to provide comprehensive services to its corporate and institutional clients through the provision of products and services in the areas of investment banking, venture capital, research, institutional sales and trading, international and principal trading and fixed income

trading.

With respect to its investment banking activity, Canaccord arranges, manages and participates in public offerings and private placements principally in equity securities or convertible instruments of public companies or companies going public through an initial public offering. A major portion of Canaccord's investment banking activity is within the areas of mining and metals, energy, technology and biotechnology, royalty/income trusts, diversified industries, financial services and real estate/REITs. Canaccord also provides services and advice in connection with mergers and acquisitions.

Canaccord's Venture Capital group is an integral component of Canaccord's ability to serve its smaller corporate clients. This group works with smaller companies and emerging growth companies to provide services related to public offerings, private placements, mergers and acquisitions, and other corporate finance advisory services.

Canaccord's Institutional Sales and Trading group and Research team provides services in connection with market information, advice and trade execution to institutional accounts. Canaccord's International Trading group deals principally with U.S brokerage firms executing orders on their behalf in Canadian listed equities and trading in U.S equities on behalf of Canadian clients.

Canaccord's principal and registered trading activity operates by taking positions, trading and making markets in equity securities including securities of companies with small to medium sized market capitalizations. Canaccord also trades in fixed income securities. Canaccord's activity in this area is generally limited to higher grade corporate and government debt instruments.

Other segment

The Other segment includes correspondent brokerage services, interest, foreign exchange revenue, and expenses not specifically allocable to Private Client Services and Global Capital Markets.

History

Canaccord Capital was incorporated as Canaccord Holdings, Ltd. in 1997 and changed its name to Canaccord Capital, Inc. June 2004.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
