The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cascade Corp. business.

About Cascade Corp.

Cascade Corporation engages in the manufacture and distribution of materials handling load engagement devices and related replacement parts for the lift truck industry and construction industry. The company also manufactures construction attachments for the construction industry.

Products

The company manufactures a range of materials handling load engagement products that are used on lift trucks and on construction and agricultural vehicles. Its products are primarily manufactured and distributed under the Cascade name and symbol. The company offers various functionally different products, each of which has various sizes, models, capacities, and optional combinations. Lift truck related products are designed to handle loads with pallets and for specialized application loads without pallets. The specialized products include devices specifically designed to handle loads, such as appliances, carpet and paper rolls, baled materials, textiles, beverage containers, drums, canned goods, bricks, masonry blocks, lumber, plywood, and boxed, packaged, and containerized products. Certain construction related products allow vehicles, such as loaders, backhoes and rough terrain lift trucks to move materials in much the same manner as conventional lift trucks. The company's other construction related products

are used on excavators and loaders for both conventional and specialized ground engagement applications.

Customers and Markets

The company's primary customers are companies and industries that use lift trucks for materials handling. These industries include pulp and paper, grocery products, textiles, recycling, and general consumer goods. The company's products are sold to the end-user customer through the retail lift truck dealer distribution channel, to lift truck original equipment dealers (OEDs), and to lift truck manufacturers as original equipment manufacturer (OEM) equipment. In addition to sales to the lift truck market, the company sells products to OEMs who manufacture construction, mining, agricultural, and industrial vehicles other than lift trucks.

The company's primary markets are North America, Europe, China, and the Asia Pacific. The Asia Pacific region includes operations in Japan, Australia, New Zealand, Korea, India, and South Africa.

Competition

The company's primary competitor is Bolzoni Auramo, an Italian public company.

History

Cascade Corporation was founded in 1943.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
