## Abstracts

Cavium Networks, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Cavium Networks, Inc. and its competitors. This provides our Clients with a clear understanding of Cavium Networks, Inc. position in the [Semiconductor](#) Industry.

The report contains detailed information about Cavium Networks, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Cavium Networks, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Cavium Networks, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Cavium Networks, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cavium Networks, Inc. business.

### **About Cavium Networks, Inc.**

Cavium Networks, Inc. provides integrated semiconductor processors that enable intelligent processing for networking, communications, storage, wireless, security, and video applications.

The company's products allow customers to develop networking, wireless, storage and electronic equipment that is application-aware and content-aware and processes voice, video and data traffic at high speeds. Its products also include a suite of embedded security protocols that enable unified threat management (UTM), secure connectivity, network perimeter protection, Deep Packet Inspection (DPI), network virtualization, broadband gateways, 3G/4G wireless infrastructure, storage systems, wireless HDMI cable replacement, and embedded video applications. The company's products are systems on a chip (SoCs) which incorporate single or multiple processor cores, an integrated architecture and customizable software that is based on a range of standard operating systems.

The company sells its products to providers of networking equipment that sell into the enterprise network, data center, broadband and consumer, and access and service provider markets. Its products are used in an array of networking equipment, including routers, switches, content-aware switches, UTM and other security appliances,

application-aware gateways, voice/video/data, or triple-play, gateways, wireless local area network (WLAN), and 3G/Wimax/Long Term Evolution (LTE access), aggregation and gateway devices, storage networking equipment, servers and intelligent network interface cards, Internet protocol (IP) surveillance systems, digital video recorders, wireless HDMI cable replacement systems, video conferencing systems and connected home and office equipment, such as print servers, wireless routers, and broadband gateways. The acquisition of MontaVista Software, Inc. (MontaVista) in December 2009 complements its portfolio of multi-core processors to deliver integrated and optimized embedded solutions to the market.

## Products

The company offers integrated semiconductors that provide single or multiple cores of processors, along with intelligent Layer 4 through 7 processing for enterprise network, data center, broadband and consumer, and access and service provider markets. Its MontaVista Software products offer commercial grade embedded Linux operating systems, development tools, support and services. Its software embedded Linux products provide an operating system and productivity tools across a range of embedded processors that are sold by the company.

The company's OCTEON, OCTEON Plus, and OCTEON II Multi-core MIPS64 processor families provide integrated Layer 4 through 7 data and security processing (with additional capabilities at Layers 2 and 3) at line speeds from 100Mbps to 40Gbps. OCTEON processors integrate control plane processing, packet processing, security processing and content acceleration, as well as a set of input/output interfaces in a single chip. The company's OCTEON processors have been adopted in various original equipment manufacturer (OEM) networking equipment, including routers, switches, content-aware switches, UTM, and other security appliances, application-aware gateways, voice/video/data, or triple-play, gateways, WLAN and 3G/4G access and aggregation devices, storage networking equipment, servers, and intelligent network interface cards.

The OCTEON Plus and OCTEON II processor families incorporate new interfaces and acceleration features for packet processing, quality of service and content processing for multimedia aware networking and 3G, 4G, and WiMax wireless applications over the previous generations. The OCTEON Plus and OCTEON II processor families also expanded OCTEON's core target markets in storage, wireless and control plane applications. The OCTEON Plus and OCTEON II processor families also provide hardware acceleration for storage applications, such as iSCSI, RAID 6 and data de-

duplication and are aimed at iSCSI targets, Fiber Channel to iSCSI bridges and disk arrays.

The company's NITROX processor family offers security processors and Layer 7 content processors that provide the functionality required for Layer

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
