Such information creates your awareness about principal trends of Celadon Group Inc. business.

About Celadon Group Inc.

Celadon Group, Inc., through its subsidiaries, provides transportation services between the United States, Canada, and Mexico.

The company's primary trucking subsidiaries include Celadon Trucking Services, Inc. (CTSI), a U.S. based company; Celadon Logistics Services, Inc. (CLSI), a U.S. based company; Servicio de Transportation Jaguar, S.A. de C.V. (Jaguar), a Mexican based company; and Celadon Canada, Inc. (CelCan), a Canadian based company.

Services

The company transports full trailer loads of freight from origin to destination without intermediate stops or handling. In international operations, it offers time-sensitive transportation in and between the United States and its two trading partners, Mexico and Canada. In addition to its international business, it offers a range of truckload transportation services within the United States, including long-haul, regional, less-than-truckload, intermodal, and logistics. The company transports freight, such as tobacco, consumer goods, automotive parts, various home products and fixtures, lawn tractors and assorted equipment, light bulbs, and various parts for engines.

Other Services

TruckersB2B: The company also operates TruckersB2B, Inc. (Truckers B2B), a marketing business that affords volume purchasing power for items such as fuel, tires, insurance, and other products and services to small and medium-sized trucking companies through its Web site, www.truckersb2b.com. TruckersB2B has approximately 20,000 member trucking fleets representing approximately 479,000 tractors.

Celadon Dedicated Services: Through Celadon Dedicated Services, the company provides warehousing and trucking services to three fortune 500 companies. Its warehouse facilities are located near the customers' manufacturing plants. It also transports the manufacturing component parts to its warehouses and sequences those parts for its customers.

Customers

The company serves approximately 1,900 customers. Its customers include Alcoa, Carrier Corporation, General Electric, International Truck & Engine, John Deere, Kohler Company, Philip Morris, Phillips Lighting, Proctor & Gamble, and Wal-Mart.

History

Celadon Group, Inc. was founded in 1985.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
