Abstracts

Celldex Therapeutics, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Celldex Therapeutics, Inc. and its competitors. This provides our Clients with a clear understanding of Celldex Therapeutics, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Celldex Therapeutics, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Celldex Therapeutics, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Celldex Therapeutics, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Celldex Therapeutics, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Celldex Therapeutics, Inc. business.

About Celldex Therapeutics, Inc.

Celldex Therapeutics, Inc. operates as an integrated biopharmaceutical company that generates a pipeline of candidates to treat cancer and other difficult-to-treat diseases. The company's immunotherapy platform includes a complementary portfolio of monoclonal antibodies, antibody-targeted vaccines, antibody-drug conjugates, and immunomodulators to create disease-specific drug candidates.

Clinical Development Programs

CDX-110

The company's primary clinical development program, CDX-110, is a peptide-based immunotherapy that targets the tumor specific molecule called EGFRvIII, a functional variant of the naturally expressed epidermal growth factor receptor (EGFR), a protein which has been well validated as a target for cancer therapy.

In 2008, the company and Pfizer Inc. (Pfizer) entered into a License and Development Agreement (the Pfizer Agreement) under which Pfizer was granted a worldwide license to CDX-110. The Pfizer Agreement also gives Pfizer rights to the use of EGFRvIII

vaccines in other potential indications.

The company initiated a Phase 2b/3 randomized study (ACT III) of CDX-110 combined with standard of care, temozolomide, versus standard of care alone in patients with GBM in approximately 30 sites throughout the United States.

CDX-011

CDX-011 is an antibody-drug conjugate (ADC) that consists of a fully-human monoclonal antibody, CR011, linked to a potent cell-killing drug, monomethyl-auristatin E (MMAE). The CR011 antibody specifically targets glycoprotein NMB or (GPNMB) that is expressed in various human cancers, including breast cancer and melanoma. The ADC technology, comprised of MMAE and a stable linker system for attaching it to CR011, was licensed from Seattle Genetics, Inc.

CDX-1307

The company's APC Targeting Technology product candidate, CDX-1307, is in development for the treatment of epithelial tumors, such as colorectal, pancreatic, bladder, ovarian and breast cancers. CDX-1307 targets the beta chain of human chorionic gonadotropin, known as hCG-Beta, which is an antigen often found in epithelial tumors.

CDX-1401

CDX-1401 is a fusion protein consisting of a fully human monoclonal antibody with specificity for the dendritic cell receptor, DEC-205, linked to the NY-ESO-1 tumor antigen.

In 2009, the company initiated enrollment in a dose-escalating Phase 1/2 clinical trial aimed at determining the optimal dose for development based on the safety, tolerability, and immunogenicity of the CDX-1401 vaccine.

CDX-1135

CDX-1135 is a molecule that inhibits a part of the immune system called the complement system.

Preclinical Development Programs

CDX-301

CDX-301 is a FMS-like tyrosine kinase 3 ligand (Flt3L) that the company licensed from Amgen in 2009. CDX-301 is a growth factor for stem cells and immune cells called dendritic cells.

CDX-1127

The company has a license agreement with the University of Southampton, UK, to develop human antibodies to CD27, a potentially major target for immunotherapy of various cancers.

CDX-014 is a fully-human monoclonal ADC that targets TIM-1, an immunomodulatory protein that appears to down regulate immune response to tumors. The antibody, CDX-014, is linked to a potent chemotherapeutic, monomethyl auristatin E (MMAE), using Seattle Genetics' proprietary technology.

CDX-1189

The company is developing therapeutic human antibodies to a signaling molecule known as CD89 or Fcα receptor type I (FcαRI).

Partnerships and Agreements

The company has partnership with GlaxoSmithKline plc (Glaxo), TopoTarget A/S, and Paul Royalty Fund II, L.P. (PRF).

Rockefeller University (Rockefeller): The company provides research and development support to Rockefeller on the development of their vaccine, DCVax-001, which refer to as CDX-2401, targeted at providing protection from infection with HIV, the virus known to cause AIDS.

Vaccine Technologies, Inc. (VTI): The company has a license agreement with VTI under which it granted a worldwide license to VTI to develop and commercialize its CholeraGarde and ETEC vaccine programs.

The company and Duke University Brain Tumor Cancer Center (Duke) entered into a license agree

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
