The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Celldonate Inc. business.

About Celldonate Inc.

CELLDONATE INC., a development stage company, engages in developing and commercializing entertainment-based mobile solutions for charity fundraising businesses.

The company is in the process of developing and intends to promote programs and software solutions that assist charitable or philanthropic organizations, provide an alternative to conventional forms of fundraising and permit individuals to play fun, interactive games on their mobile devices and receive prizes or information for doing so.

The company has completed the development of a suite of applications aimed at individuals with Internet-enabled mobile devices known as the Celldonate mobile games suite. This suite includes both games of chance as well as skills-based games which individuals would be able to play to earn points towards redeeming prizes from participating retailers and service providers.

The company has completed the development of a suite of applications aimed at individuals with Internet-enabled mobile devices known as the Celldonate mobile games suite. This suite includes games of chance, as well as skills-based games which individuals would be able to play to earn points towards redeeming products and

services from participating retailers and service providers.

The Celldonate mobile games suite consists of five independent applications and a platform for transferring funds through mobile devices. The five applications that comprise the Celldonate mobile games suite include: a lottery game; a Bingo game; a slot machine game; a trivia game; and a memory game.

The additional mobile applications that the company begun to develop include: an auction that gives individuals the opportunity to bid on goods and services that charities have received as donations and wish to sell to raise funds for various causes; a tentatively-titled 'back stage pass' that gives individuals interested in downloading music the opportunity to access new music that has yet to be released in stores; a tentatively-titled 'concert alert' that provides individuals with concert updates pertaining to their area of residence and also gives them the opportunity to access tickets prior to their release to the general public; and a tentatively-titled 'mobile blessing' that gives individuals the opportunity to receive daily or weekly blessings directly from their church or parish of choice.

History

CELLDONATE INC. was incorporated in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
