The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cementos Argos business.

## **About Cementos Argos**

Cementos Argos S.A., a commercial company, produces cement in the United States, Columbia, and Latin America. The company produces concrete mixes and any other materials or articles made of cement, clinker, lime or clay; purchases and sells minerals or mineral deposits that are used by the cement industry and others; and acquires and sells rights to prospect for and mine the aforementioned minerals by means of concessions, privileges, leasing agreements or any other type of arrangement.

### **Operations**

The company mines, prospects for, processes and transforms quarry and shore materials and generally speaking mineral deposits, manufactures and sells hydraulic concrete, asphalt paving and similar materials, as well as to carry out agro-industrial operations on its own land.

The company also provides advisory services for both companies and private individuals thereby providing temporary assistance and manpower in carrying out their activities. In addition, it prospects for, mines, manufactures, processes, trades, and sells rock-based minerals, such as sand, cement and gravel, premixed concrete and prefabricated concrete articles, and concrete blocks, as well as hydraulic concrete,

asphalt paving, quarry and shore materials, mineral deposits, and non-renewable natural resources;

The company cultivates and exploits forestland; mines, produces, and sells aggregate for construction purposes; and carries out mining work. It also installs and assembles equipment; acquires, buys, sells, owns, manages, encumbers, rents, borrows, hires, and disposes real estate and movable property; purchases or obtains patents, trademarks, copyright, licenses, and formulas; transports passengers and cargo through overland, air, and river/sea forms; and acquires, invests in, purchases, and sells shares, securities, equity stakes, or bonds.

Additionally, the company imports, exports, purchases, and sells various types of merchandise and products, metal ore and non-metallic minerals, cement, clinker, coal, equipment, artifacts, vehicles, machinery, tools, spare parts, and accessories; conducts business in the agricultural and cattle-raising industries; generates and sells gas-fired electricity; and carries out activities related to landfills, dredgings, and civil and ocean engineering works.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
