The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cemtrex Inc. business.

About Cemtrex Inc.

Cemtrex, Inc. designs, engineers, assembles, and sells emission monitoring equipment and instruments, and air filtration products to the chemicals, pulp and paper, steel, power, coal, and petrochemical industries, as well as to municipalities, hospitals, and state and federal governments.

The company's emission monitoring systems are installed at the exhaust stacks of industrial facilities and are used to measure the outlet flue gas concentrations of regulated pollutants, such as sulfur dioxide, hydrogen chloride, hydrogen sulfide, nitrous oxides, ammonia, nitrogen oxide, carbon dioxide, carbon monoxide and other regulated pollutants.

The company also markets technologies and services for carbon credit projects through abatement of greenhouse gases, such as Methane, Nitrous Oxide and carbon Dioxide, pursuant to the Kyoto protocol and assists project owners in the sale of carbon credits. Companies, agencies and governments buy, sell, bank, and trade Carbon Credits called Certified Emission Reductions or CERs. The company provides consulting services for such projects and arranges for investment equity and the sales of CERs for its customers.

The company developed a product line named Green DCV, which provides energy

efficiency in HVAC systems for commercial buildings and industrial installations. Its Green-DCV system uses carbon dioxide (CO₂) sensors to monitor CO₂ levels inside a building. The company, through its subsidiary Griffin Filters LLC, provides a line of air filtration and environmental control equipment to industries, such as: chemical, cement, steel, food, construction, mining, & petrochemical. Its equipment is used to remove dust, corrosive fumes, mists, hydrocarbons, volatile organic compounds, submicron particles and particulate from industrial exhausts and boilers; clean noxious and acid gases, such as sulfur dioxide, hydrogen chloride, hydrogen sulfide, chlorides, and organics from industrial exhaust stacks prior to discharging to the atmosphere; control emissions of coal, dust, sawdust, phosphates, flyash, cement, carbon black, soda ash, and silica from construction facilities, mining operations and dryer exhausts.

Products

The company's products include Opacity monitor: Compliance & non-compliance types.

Extractive Continuous Emission Monitors (CEMS): The company provides direct-extractive and dilution-extractive CEMS equipment & systems that are applicable for utilities, industrial boilers, FGD systems, SCR-NO_x control, furnaces, gas turbines, process heaters, incinerators, and process controls.

Ammonia Analyzer: The flue gas stream which contains ammonia, nitrogen oxides and sulfur dioxide utilize Ultra Violet radiation techniques for measurements. These components absorb UV radiation, and therefore would be monitored by process analyzers that utilize UV absorbance techniques for detection.

Mercury Analyzer: The company's SM4 mercury monitor provides online measurements. Cemtrex SM4 works on a thermo catalytic principle avoiding wet chemical sample treatment.

The company provides consulting services for carbon credit projects from abatement of greenhouse gases pursuant to Kyoto protocol and assists project owners in developing such projects globally. Companies, agencies and governments buy, sell, bank and trade Carbon Credits called Certified Emission Reductions or CERs.

Competition

The company competes with Thermo Fisher Scientific Inc., Tekran Instruments Corporation, Altech Environment USA, Shaw Group, and Horiba Instruments Inc.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
