term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Centerra Gold Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Centerra Gold Inc. business.

About Centerra Gold Inc.

Centerra Gold Inc., a gold mining company, engages in the operation, development, acquisition, and exploration of gold properties primarily in Asia, the former Soviet Union and other emerging markets worldwide. As of December 31, 2008, the company's proven and probable ore reserves totaled 5.8 million ounces of contained gold.

The company's product is gold, produced from mines located in the Kyrgyz Republic and Mongolia. The production from the Kumtor Gold Project is sold to the Kyrgyzaltyn refinery in the Kyrgyz Republic while production from the Boroo Gold Project is sold to the Johnson Matthey Limited refinery that is located in Ontario, Canada.

Properties

Kumtor: The company owns 100% of the Kumtor gold mine which is located in the Kyrgyz Republic, approximately 350 kilometres southeast of the capital Bishkek and approximately 60 kilometres north of the border with the People's Republic of China.

Boroo: The company owns a 100% interest in the Boroo mine which is located 110 kilometres northwest of Ulaanbaatar, Mongolia's capital.

Gatsuurt: The company owns a 100% interest in the Gatsuurt property, located in Mongolia. As of December 31, 2007, proven and probable reserves for the Gatsuurt project, which includes the Main and Central Zones, were estimated to be 9.1 million tones.

REN: The company owns a 63% interest in the REN property in Nevada.

Other: Additionally, the company is earning an interest in joint venture exploration properties located in Russia, Turkey and the United States (Nevada).

Significant Events

In August 2009, Stratex International plc has signed a joint venture agreement with the company to explore and develop the Oksut project, a high-sulphidation gold discovery.

In December 2009, KEFI Minerals Plc has entered into a joint venture agreement with Centerra Gold Inc. for its 100%-owned Bakir Tepe Project in south-western Turkey. Centerra would earn a 51% interest in the Bakir Tepe Project.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
