Abstracts

Certified Environmental Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Certified Environmental Group Inc. and its competitors. This provides our Clients with a clear understanding of Certified Environmental Group Inc. position in the Industry.

The report contains detailed information about Certified Environmental Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Certified Environmental Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Certified Environmental Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Certified Environmental Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Certified Environmental Group Inc. business.

About Certified Environmental Group Inc.

Certified Environmental Group, Inc. provides environmental consulting, engineering, evaluation, and design and laboratory services to residential, commercial, and government clients in the private and public sectors primarily located in the northeastern region of the United States. The Company's environmental services include lead-based paint management services, such as consulting, inspection, detection, sampling, testing, risk assessment, in-plant management, project monitoring, abatement, training, and turn-key operations; air quality services; environmental site assessments to residential, commercial and industrial real properties and asbestos abatement services on a limited basis for existing clients, or as part of larger environmental projects. In addition, the company provides investigation, assessment, and remediation for all relevant hazardous substances in air, water, and soil. The company contracts with professional licensed entities to undertake remediation, removal, transportation, and disposal of hazardous materials. Other than subcontracting for hazardous material remediation, collection and disposal, the Company utilizes independent, accredited subcontractors for laboratory testing analysis.

Lead Remediation Environmental Services

The Company utilizes its technology in testing for lead, including XRF Spectrum Analyzer devices for component testing of lead in paint, dust, soil, and water, as well as high tech laboratory analysis.

Lead-Based Paint Turn-Key Operations

The Company provides turn-key operations, including certified lead surveys, detection, sampling, laboratory testing and analysis, assessment, compliance, training, remediation (removal) and/or hazard reduction and construction services. The Company utilizes lead-based paint XRF spectrum analyzers for component lead-based paint testing. All of the Company's field technicians have experience with radiation safety instrument operation and are trained and certified LBP inspectors, risk assessors, abatement workers and supervisors. The Company provides full LBP turn-key services to government, residential, commercial and industrial facilities, office buildings, manufacturing, schools, health and day care centers, multi-family small and large apartment buildings that include co-ops and condominiums, and private residences.

Lead-Based Paint Services

Lead surveys conducted by the Company's Lead Based Paint experts provide clients with accurate lead surveys, site evaluations and hazard assessments. Additionally, the Company assists in evaluating client/facility's health and safety requirements. The Company's services also include identification of regulatory violations, required health and safety documentation, health and safety monitoring and maintenance programs.

Lead Testing (Laboratory 24 Hours/7 Days a Week)

The Company provides onsite sampling of lead chips, lead in dust, soil, air and water. The Company utilizes independent third-party certified test laboratories for sample analysis and evaluation, including final abatement clearance testing. Certified industrial hygienists, technicians and testing specialists utilize laboratory equipment to analyze samples and report results.

Lead Air Monitoring Services (Contractual On-Going Safety Monitoring)

The Company provides OSHA (personal) air monitoring services during LBP abatement. The Company also provides area (environmental) air monitoring, if requested by the client.

Lead Remediation -Hazardous Contamination Clean-Up

Lead remediation is an economic, as well as a compliance and safety issue. Since the Company offers all abatement techniques, the Company's experts can advise the clients on which methods offer the most cost-effective results for the project.

Lead Restoration (Construction)

Efficient Post-Abatement Restoration is essential to the timely completion of a lead abatement project and the return of a facility to habitable/operational status. Since the company provides abatement, restoration and construction services, it provides integrated solutions that are scheduled to meet the clients' specific requirements.

Lead Safety/Compliance Certification

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
