The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of CGI Group, Inc. business.

### **About CGI Group, Inc.**

CGI Group Inc., directly or through its subsidiaries, manages information technology services (IT services), including outsourcing, systems integration and consulting, software licenses and maintenance, as well as business process services (BPS).

#### Services

The company provides IT services and BPS to clients worldwide. It's delivery model provides for work to be carried out onsite at client premises, or through one of its centers located in North America, Europe, and India.

Momentum: It is an integrated enterprise resource planning suite with approximately 100 installations across 3 branches of the U.S. federal government, including 16 agencies.

AMS Advantage is an enterprise resource planning suite that 25 U.S. state governments rely on to support financial management.

MSuite, PrimeSuite are wealth management solutions adopted in the Canadian financial industry.

**Consulting:** The company provides a range of IT and management consulting services, including business transformation, IT strategic planning, business process engineering, and systems architecture.

**Systems integration:** The company integrates and customizes technologies and software applications to create IT systems that respond to clients' strategic needs.

#### Management of IT and business functions (outsourcing)

Clients contract entire or partial responsibility for their IT or business functions to the company and access the technology, while retaining control over strategic IT and business functions. It also integrates clients' operations into technology network. The company transfers specialized professionals from clients. Services provided as part of an outsourcing contract may include development and integration of new projects and applications; applications maintenance and support; technology management (enterprise and end-user computing and network services); transaction and business processing, as well as other services, such as payroll and document management services.

#### Markets for CGI's Services

The company's targeted markets include: government and healthcare — helping organizations improve the performance of functions through the use of information technology; financial services — helping clients by adopting solutions that support integrated customer-focused operations; telecommunications and utilities — helping providers deliver revenue streams; retail and distribution — establishing customer-centered operating models; and manufacturing — helping clients leverage information technology to manage the entire product lifecycle.

#### Customers

The company works with large and medium sized businesses in the private and public sectors worldwide.

#### History

CGI Group Inc. was founded in 1976.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
