The CH Energy Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes CH Energy Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of CH Energy Group Inc. business.

About CH Energy Group Inc.

CH Energy Group Inc. operates as a holding company. The company's subsidiaries include Central Hudson Gas & Electric Corporation (Central Hudson) and Central Hudson Enterprises Corporation (CHEC).

Central Hudson has one wholly owned subsidiary, Phoenix Development Company, Inc. (Phoenix). CHEC has two wholly owned subsidiaries: Griffith Energy Services, Inc. (Griffith) and CH-Auburn Energy, LLC (CH-Auburn), CH-Greentree, LLC (CH-Greentree), CH-Lyonsdale, LLC (CH-Lyonsdale), and CH Shirley Wind, LLC (CH Shirley).

Central Hudson

Central Hudson operates as a natural gas and electric corporation. Central Hudson purchases, sells at wholesale, and distributes electricity and natural gas at retail in portions of New York State. Central Hudson also generates a small portion of its electricity requirements.

Central Hudson serves a territory of approximately 85 miles along the Hudson River and approximately 25 to 40 miles east and west of the Hudson River. Electric service is

available throughout the territory, and natural gas service is provided in and about the cities of Poughkeepsie, Beacon, Newburgh, and Kingston, New York, and in certain outlying and intervening territories.

CHEC and its subsidiaries and investments

CHEC is a wholly owned subsidiary of CH Energy Group. CHEC engages in the business of marketing petroleum products and related services to retail and wholesale customers and providing service and maintenance of energy conservation measures and generation systems for private businesses, institutions, and government entities. CHEC has also participated in cogeneration, wind generation, biomass energy projects, and alternate fuel and energy production projects in Connecticut, New Jersey, New Hampshire, New York, Wisconsin, and Pennsylvania, and a corn-ethanol plant in Nebraska.

Griffith is an energy services company engaged in fuel distribution, including heating oil, gasoline, diesel fuel, kerosene, and propane, and the installation and maintenance of heating, ventilating, and air conditioning equipment in Virginia, West Virginia, Maryland, Delaware, Pennsylvania, Rhode Island, Connecticut, Massachusetts, New York, New Jersey and Washington, D.C. Griffith has acquired the assets of 44 regional fuel oil, propane, and related services companies.

Other Subsidiaries and Investments

CH-Lyonsdale: The company has a 75% controlling interest in a 19-megawatt wood-fired biomass electric generating plant.

CH-Greentree: The company has a 100% equity interest in a molecular gate used to remove nitrogen from landfill gas which is being leased to Greentree Landfill Gas Company, LLC (Greentree) at Greentree's operating landfill gas processing plant at the Greentree landfill in western Pennsylvania.

CH-Auburn: The company has a 100% equity interest in a 3-megawatt electric generating plant that would utilize methane gas generated by the City of Auburn, NY landfill to produce and sell electricity to the City.

Cornhusker Holdings: The company has a 12% equity interest. It also has a subordinated debt investment in the owner of Cornhusker Energy Lexington, LLC (CEL).

CH-Community Wind: The company has a 50% equity interest in a joint venture that owns 18% equity interest in a 24-megawatt wind project in Bear Creek, Pennsylvania and a 7.5-megawatt wind project in Atlantic City, New Jersey, which are both commercially operational.

CH Shirley: The company has a 90% controlling interest in a 20-megawatt wind farm facility to be constructed in Wisconsin.

The company has other interests in renewable energy projects and partnerships and an energy sector venture capital fund.

History

CH Energy Group, Inc. was founded in 1926.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
