The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Charter Financial Corp. business.

About Charter Financial Corp.

Charter Financial Corporation operates as a holding company for the CharterBank, which provides various commercial banking services to individuals and small business consumers.

Market Area

The company operates through its main office in West Point, Georgia and 16 branch offices located in West Point, Bremen, Carrollton, LaGrange, Newnan, and Peachtree City, Georgia, and Auburn, Opelika, and Valley, Alabama. It also operate a loan origination office in Norcross, Georgia.

Loan Portfolio

The company's lending operations consist of the following segments: commercial real estate lending; single-family residential mortgage lending for retention in its portfolio; construction lending; and residential mortgage lending for resale in the secondary mortgage market. It also originates consumer loans (including home equity loans and other forms of consumer installment credit), and commercial business loans.

Commercial Real Estate Loans: The company originates commercial real estate loans, especially in its markets of Carroll, Coweta, Haralson, and Fayette Counties. Its commercial real estate loans are secured by offices, hotels, strip shopping centers, land or convenience stores located principally in Georgia and Alabama. Multi-family mortgage loans, which it categorizes as a subset of its commercial real estate loans, are originated for new and existing properties and are made on apartment buildings.

Residential Mortgage Loans: The company originates first and second mortgage loans secured by one- to four-family residential properties within Georgia and Alabama. It originates both fixed rate and adjustable rate one- to four-family residential mortgage loans.

Construction and Development Loans: The company makes financing for the purchase of building lots. It makes loans primarily for the construction of one- to four-family residences but also for multi-family and nonresidential real estate projects on a select basis. It offers two principal types of construction loans: builder loans, including both speculative (unsold) and pre-sold loans to pre-approved local builders; and construction/permanent loans to property owners that are converted to permanent loans at the end of the construction phase.

Commercial Loans and Consumer Loans: The company also originates non-mortgage loans, including commercial business and consumer loans. The majority of its non-mortgage loans are consumer loans, including loans on deposits, second mortgage loans, home equity lines of credit, auto loans, and various other installment loans. It primarily offers consumer loans (excluding second mortgage loans and home equity lines of credit) as an accommodation to customers. It offers home equity lines of credit as a complement to its one- to four-family residential mortgage lending.

Investment Portfolio

As of September 30, 2010, the company's investment portfolio included the securities of municipals; mortgage-backed and mortgage-related securities, such as Fannie Mae, Ginnie Mae, and Freddie Mac; and collateralized mortgage obligations, such as Fannie Mae, Ginnie Mae, Freddie Mac, and other.

Deposits

The company offers various deposit products, including checking, NOW, money market, regular savings, and term certificate accounts. It also offers a rewards checking product.

History

Charter Financial Corporation was founded in 1954.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
