The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cheviot Financial Corp. business.

About Cheviot Financial Corp.

Cheviot Financial Corp. operates as the holding company for Cheviot Savings Bank, which provides a range of banking services in Ohio.

Market Area

The company conducts its operations from its executive office in Cheviot, Ohio and six full-service branches, all of which are located in the western section of Hamilton County, Ohio. It also conducts business in the southeastern Indiana region, primarily in Dearborn, Ripley, Franklin, and Ohio Counties. It also originates loans in the northern Kentucky region secured by properties in Campbell, Kenton, and Boone Counties.

Lending Activities

The company's primary lending activity has been the origination, for retention in its portfolio, of fixed-rate and adjustable-rate mortgage loans collateralized by one- to four-family residential real estate located within its primary market area. It also originates commercial real estate loans, including multi-family residential real estate loans, construction loans, business lines of credit, and consumer loans.

Residential Mortgage Loans: The company originates mortgage loans secured by one-to four-family properties, which serve as the primary residence of the owner. As of December 31, 2009, the company offered various residential mortgage loan products: fixed-rate loans of various terms; adjustable-rate loans; home equity lines of credit; loans tailored for first time home buyers; construction/permanent loans; and short-term (bridge) loans. Home equity lines of credit are made for owner-occupied homes and are secured by first or second mortgages on residential properties.

Construction Loans: The company originates construction loans for owner-occupied residential real estate, and commercial builders of residential real estate, improvement to existing structures, new construction for commercial purposes, and residential land development.

Multi-Family Loans: The company originates fixed-rate and adjustable rate multi-family real estate loans with amortization schedules of approximately 25 years.

Commercial Real Estate Loans: The company originates commercial real estate loans to finance the purchase of real property, which consists of land and/or developed real estate. A majority of its commercial real estate loans are secured by properties in Hamilton County.

Consumer Loans: The company makes loans secured by deposit accounts up to 90% of the amount of the depositor's collected deposit account balance.

Securities Activities

As of December 31, 2009, the company's investment portfolio included U.S. government and agency securities; municipal obligations; and mortgage-backed securities.

Deposits

The company offers passbook and statement savings accounts, NOW accounts, interest-bearing demand accounts, non-interest-bearing demand accounts, money market accounts, and certificates of deposit.

History

Cheviot Financial Corp. was founded in 1911.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
