Abstracts

China Health Industries Holdings, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between China Health Industries Holdings, Inc. and its competitors. This provides our Clients with a clear understanding of China Health Industries Holdings, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about China Health Industries Holdings, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for China Health Industries Holdings, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The China Health Industries Holdings, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes China Health Industries Holdings, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China Health Industries Holdings, Inc. business.

About China Health Industries Holdings, Inc.

China Health Industries Holdings, Inc. engages in the manufacture and sale of health products, green (or organic) food, and the detection of disease susceptibility or pre-disposition through genetic studies.

Products

The company has the license to manufacture 27 medical drugs. It also has the license to manufacture and sell two health supplement products. In additional, it distributes and sells 52 kinds of health food.

Health Supplements

The company's 'QunLe' brand Sailuozhi soft capsule, which is made from frog oil, soybean isoflavone, procyanidine (made from grape seeds) and vitamin C, is for freckle removal and supplementing the water content of the skin. It also owns one other health product known as 'Kindlink' brand propolis and black ant capsule made from propolis, black ant, acanthopanax, astragalus root.

Health Food and Organic 'Green' Food

The company's health and organic 'green' food products include abalone, sea cucumber, and frog oil soft capsules; ganodermalucidum and aweto soft capsules; propolis soft capsules; deep sea fish oil; liquid calcium; multi-vitamins; soybean isoflavone; and royal jelly.

Medical Drugs

Stomach-Tonic Tablets: These are used in the treatment of pain from stomach distention, eructation with fetid odor and fecal disorders caused by gasterasthenia and dyspeptic retention.

Pediatric Compound Sulfamethoxazole Tablets (0.125g and 0.25g): Used in the treatment of: urinary tract infection caused by sensitive strains of *Escherichia coli*, *Klebsiella*, *Enterobacter*, *Proteus mirabilis*, *Bacillus proteus*, and *Proteus morganli*; acute otitis media in children of approximately 2 years old caused by *Streptococcus pneumoniae* or *Hemophilus influenza*; acute episode of adult chronic bronchitis caused by *Streptococcus pneumoniae* or *Hemophilus influenza*; intestinal infection and *Shigella* infection caused by sensitive strains of *Shigella flexneri* and *Shigella sonnei*; and pneumonia caused by *Pneumocystis carinii*; prevention of pneumonia caused by *Pneumocystis carinii*; and turista caused by enterotoxic *Escherichia coli*.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
