Abstracts

China Hydroelectric Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between China Hydroelectric Corporation and its competitors. This provides our Clients with a clear understanding of China Hydroelectric Corporation position in the [Utilities](#) Industry.

The report contains detailed information about China Hydroelectric Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for China Hydroelectric Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The China Hydroelectric Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes China Hydroelectric Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China Hydroelectric Corporation business.

About China Hydroelectric Corporation

China Hydroelectric Corporation engages in the ownership and operation of small hydroelectric power projects in China.

The company primarily identifies, evaluates, acquires, develops, constructs, and finances hydroelectric power projects in China. It also acquired development rights to a 1,000.0 MW pumped storage hydroelectric power project.

The company wholly owns 12 operating hydroelectric power projects and has a controlling interest in 1 operating hydroelectric power project. Its operating hydroelectric power projects are located in four provinces in China: Zhejiang, Fujian, Yunnan and Sichuan. Installed capacity at the company's projects reached 396.0 MW, as of December 31, 2009.

Completed Projects

Yunnan Province

Binglangjiang I: Binglangjiang I hydropower plant is a run-of-the-river, diversion-type hydropower plant with an installed capacity of 21.0 MW. Binglangjiang I hydropower

plant is located on the Binglangjiang River, which is in the southwestern corner of Yunnan province in Yingjiang County, Dehong Prefecture.

Binglangjiang II: Binglangjiang II hydropower plant is a run-of-the-river, diversion-type hydropower plant with a design capacity of 20.0 MW. Binglangjiang II hydropower plant is located on the Binglangjiang River in the southwestern corner of Yunnan province in Yingjiang County, Dehong Prefecture. The area of the powerhouse building that contains the plant is 800.0 square meters. The area of the land the project utilizes is 2,310.7 square kilo meters, including the drainage basin.

Husahe: The Husahe hydroelectric project is located in Dehong county, Yunnan province and consists of three independent projects, Husahe 3, Husahe 4 and Mangxian, in series on the Husahe River with a total installed capacity of 18.7 MW. The drainage basins for the projects are 262.6 km². Husahe 3 is a 3.2 MW four component facility consisting of a masonry diversion, 816 meter long canal and penstock, powerhouse and a 35 kv substation which is connected to a 110 kv substation at Mangxian hydropower Station. Husahe 4 is a 14 MW four component facility consisting of a gravity dam, 459 meter concrete lined tunnel and penstock, powerhouse and 35 kv substation which is connected to a 110 kv substation owned by the utility Mangxian Hydropower Station.

Sichuan Province

Liyuan: Liyuan is a low head run-of-the-river hydroelectric power project with an installed capacity of 12.0 MW. Liyuan is located on the Donghe river, which is in northeast Sichuan province at Donghe, Cangxi County, Guangyuan City. Liyuan consists of a concrete gravity dam, powerhouse, hinged spill way gates and ship lock integrated into one structure, and a substation.

Zhejiang Province

Shapulong: Shapulong hydropower plant is an impoundment reservoir hydropower plant with an installed capacity of 25.0 MW.

Yingchuan: Yingchuan hydropower plant is an impoundment reservoir hydropower plant with an installed capacity of 40.0 MW. Yingchuan hydropower plant is located on the Yingchuan stream.

Wuliting: Wuliting hydropower plant is a low head, run-of-the-river plant with an installed

capacity of 42.0 MW. The Wuliting hydropower plant is located on the Daxi stream. The Wuliting hydropower plant consists of a concrete gravity dam, powerhouse, spill way, and ship lock integrated into one structure, and a substation. The powerhouse contains three 14.0 MW horizontal bulb turbines manufactured by Hangzhou Jianghe Electromechanical Equipment Co., Ltd.

Ruiyang: Ruiyang hydropower plant is an impoundment reservoir project with an installed capacity of 32.0 MW. The Ruiyang hydropower plant is located on the upper reach of Longquan Brook (Mei Brook), a tributary to Ou River, within the boundaries of Xiaomei Township, Longquan City, Zhejiang province. The Ruiyang hydropower plant is a five component project consisting of a concrete-faced-rock-fill dam, a four kilo meters tunnel, penstock, powerhouse, and substation.

Jiulongshan and Zhougongyuan: Jiulongshan and Zhougongyuan is a hydroelectric power project complex consisting of three separate hydroelectric power projects in series on the same river. The upstream hydroelectric power project

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
