Abstracts

China Integrated Energy, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between China Integrated Energy, Inc. and its competitors. This provides our Clients with a clear understanding of China Integrated Energy, Inc. position in the [Energy](#) Industry.

The report contains detailed information about China Integrated Energy, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for China Integrated Energy, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The China Integrated Energy, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes China Integrated Energy, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China Integrated Energy, Inc. business.

About China Integrated Energy, Inc.

China Integrated Energy, Inc. engages in the development, exploration, production, and distribution of bio-diesel; the wholesale distribution and processing of heavy oil and finished oil products; and the sale of gasoline and diesel at retail gas stations.

The company sells primarily gasoline, diesel and heavy oil in 14 provinces and municipalities through 7 sales offices located in various regions of China. It also uses 4 oil storage depots located in Shaanxi Province.

Segments

WHOLESALE DISTRIBUTION OF FINISHED OIL AND HEAVY OIL PRODUCTS

Oil supply

The company sells on a wholesale basis various oil products including gasoline, diesel, heavy oil and naphtha. Gasoline and diesel represent the majority of oil products consumed in China. Diesel is mainly used in vehicles and agricultural machines with diesel engines. Heavy oil is used as fuel for ship boilers, heating furnaces, metallurgical furnaces and other industrial furnaces.

Suppliers: The company's suppliers include Shaanxi Yanchang Group and Xi'an Baorun Industrial.

Sales and Marketing: The company developed a sales network for its products in 14 provinces, including Shaanxi, Henan, Hebei, Shandong, Shanxi, Hunan, Hubei, Jiangxi, Guizhou, Yunnan, Fujian and Xinjiang; and two municipalities, Beijing and Shanghai.

Customers: The company sells its finished oil and heavy oil products to regional distributors in China that supply to retail service stations and directly to end users through its retail gas stations. Its major customers include China Petroleum and Chemical Corporation Chuanyu Trading Co., Ltd.

Competition: The company competes with Shaanxi Dongda Petro-Chemical Co., Ltd., Shaanxi Dayun Petrochemical Material Co., Ltd., and Baoji Huahai Industry Corp.

PRODUCTION AND SALE OF BIODIESEL

Raw Material Supply: The company a raw material purchasing contracts with local associations, such as Tongchuan City Chinese Prickly Ash Association, the Forestry Bureau of Yongshou County, the Forest and Fruits Production Managing Station of Danfeng County, the Forestry Bureau of Ningqiang County, and the Forestry Bureau of Liuba County.

Customers

The company primarily targets oil product trading companies in China (sales subsidiaries of SINOPEC and PetroChina) and end users (gas stations, electric power companies and shipping companies) as its customers.

OPERATION OF RETAIL GAS STATIONS

The company sells all grades of gasoline and diesel at its 12 retail gas stations. Its customers include automobile, bus, and truck drivers.

History

The company was founded in 1999. It was formerly known as China Bio Energy Holding Group Co., Ltd. and changed its name to China Integrated Energy, Inc. in 2009.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
