Abstracts

China New Borun Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between China New Borun Corporation and its competitors. This provides our Clients with a clear understanding of China New Borun Corporation position in the [Food and Beverages Industry](#).

The report contains detailed information about China New Borun Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for China New Borun Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The China New Borun Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes China New Borun Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China New Borun Corporation business.

About China New Borun Corporation

China New Borun Corporation produces and distributes corn-based edible alcohol in the People's Republic of China. The company sells its alcohol products primarily as an ingredient to producers of baijiu, a grain based alcoholic beverage.

Products and Primary Markets

The company's principal product is corn-based edible alcohol. In its production of corn-based edible alcohol, it also produces DDGS Feed and corn germ as by-products.

Edible Alcohol

Edible alcohol is a colorless, transparent solution of ethanol or a mixed solution of water and ethanol that is produced through the filtration and refined distillation of fermented grain and yeast. The company produces its edible alcohol through the distillation of fermented corn. Edible alcohol is an organic product used in various industries to produce a range of other products, including alcoholic drinks, cleaning solvents, perfumes, cosmetics, dyes, medicines, and fuel.

DDGS Feed

DDGS Feed is a high-protein by-product of edible alcohol, which contains proteins, fats, amino acid, vitamins, and various kinds of minerals. DDGS Feed is a digestible protein and energy source for beef cattle, can be used in turkey and swine applications and acts as a feed for both feedlot and dairy cattle. DDGS Feed is also fed to poultry and its use is increasing in the pork industry. DDGS Feed is formed through a distillation, evaporation and drying process, which occurs after microbial fermentation of corn in the process of edible alcohol production. In the production of edible alcohol, only starch from the corn is used and the remaining nutrients (such as protein, fiber and oil) are used to produce DDGS Feed.

The main market for the company's DDGS Feed is comprised of sales to feed processing factories, which provide DDGS Feed to poultry, livestock, cow, sheep, chicken, ducks, and fish.

Corn Germ

Corn germ is a food product which is created through the process of isolating the embryo buds in corn by removing the outer covering and starch. Corn germ contains the most useful nutrients in the corn kernel.

Product under Development—Liquid Carbon Dioxide

The company has a plan at its Shouguang facility to develop liquid carbon dioxide.

Customers

The company's customers are primarily local baijiu distilleries in Shandong and Heilongjiang provinces.

Competition

The company's competitors include Jilin New Tian Long, COFCO Zhaodong, Meihekou Fukang, and Lianyungang Dongcheng.

History

China New Borun Corporation was founded in 2000.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
