The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China Organic Agriculture, Inc. business.

About China Organic Agriculture, Inc.

China Organic Agriculture, Inc. engages in the acquisition, trading, and distribution of agricultural products, such as corn, soybean and rice, acquired from third parties, which are then sold mainly to five regions in China, including Beijing, Shanghai, Zhejiang, Guangdong, and Liaoning.

The Bellisimo Vineyard –Wine Operations

The company owns the Bellisimo Vineyard, a 153 acre operating vineyard in Sonoma County, California. In addition to its grape growing activities, there are seven buildings located on the Bellisimo Vineyard, which the company rents to third parties. The company has entered a joint venture with China-based Xinbin Manchu Autonomy County East Star Wine Company Ltd. (Xinbin). The joint venture, Bellisimo Ice Wine, is intended to enable the company to market premium table wines and specialty ice wines in China. The company owns 60% of Bellisimo Ice Wine.

Grain Purchasing, Distribution, and Logistic Services

The company owns interest in Dalian Baoshui District Huiming Industry Limited (Dalian

Huiming), which engages in grain purchasing, international and domestic trading, wholesale sales, and food delivery logistic services. Dalian Huiming's activities are primarily focused on soybeans, corns and cereal crops, which are major products of the provinces located in northeastern China. Majority of Dalian Huiming's sales are to other distributors or industrial users of agricultural products and it distributes its products in many regions of China, including Liaoning Province, Jiling Province, Heilongjiang Province, Sichuan Province, Fujian Province, and the cities of Beijing and Shanghai.

Acquisitions

In March 2010, the company completed the acquisition of 60% of the capital stock of Changbai Eco-Beverage Co., Ltd. (Changbai), which produces various products from blueberries grown in the Mountain Changbai region of northeast China, including blueberry wines, blueberry beverages, blueberry food products, such as jam, jelly, preserves and cakes, and blueberry healthcare products. Changbai also produces honey and other products from locally grown herbs and fruits.

Customers

The company's customers include Shenzhen Shen Jing Da Agriculture Ltd.; Beijing Golden Valley Trading Co. Ltd.; Dashiqiao Huan Cheng Oil Co. Ltd.; Chian Xinliang Logistics Co. Ltd.; and Shanghai Good Friend Trading Group, Co. Ltd.

Suppliers

The company's main suppliers include Jiling Shen Kang Long Rice Co. Ltd; Wuchang Yangxing Rice Co. Ltd; Heihe Aihui Grain Storage Co. Ltd; Heilongjiang Linkou Diaoling Grain Storage Co. Ltd; and Heilongjiang BaoQuanLin Grain Transportation Co. Ltd.

Competition

The company competes with China Grain Co. Ltd.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
