The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China Real Estate Information Corporation business.

About China Real Estate Information Corporation

China Real Estate Information Corporation, through its subsidiaries, provides real estate information, consulting, advertising, and online services in the People's Republic of China. It also operates a real estate Internet business in China through China Online Housing Technology Corporation (COHT). The company is a subsidiary of E-House (China) Holdings Limited.

The company operates its proprietary CRIC system, which is a real estate information database and analysis system. As of December 31, 2009, its CRIC system contained detailed data on approximately 48,500 developments or buildings and approximately 39,700 parcels of land for development in 75 cities throughout China.

Services

The company provides two principal types of services using its CRIC system: subscription-based real estate information services and project-based real estate consulting services. In addition, the company also offers real estate advertising services

and operates real estate Internet business. As of December 31, 2009, its network consisted of its headquarters in Shanghai and branch offices in 33 cities. In addition, the company also collects data in 41 additional cities.

REAL ESTATE INFORMATION SERVICES

The company provides two levels of real estate information services relying upon its CRIC system: data subscription services and data integration services.

Data Subscription Services: The company markets and sells, on a subscription basis, the use of its CRIC system. Because information in its CRIC system is organized by cities, clients can tailor subscriptions to their own needs by subscribing only to information relating to particular cities. It has launched an upgraded version of the CRIC system, CRIC 2009, which allows subscribers to access the CRIC system via the Internet from their own computers by installing a logon interface software. Once the installation is completed, the subscriber can access its CRIC system using an assigned user ID and password.

Data Integration Services: In addition to basic subscriptions, the company also offers data integration services by using the information and data contained in its CRIC system and its design and analytical capabilities. These premium services include, in addition to access to its CRIC system, periodic research reports and analysis that suit the specific needs and requirements of individual clients. These reports are delivered in electronic or paper format on a daily, weekly, monthly, quarterly, or annual basis and may include analysis of real estate developments and transactions for a city, a district, or individual developers and projects, or analysis of periodic trends in transaction volume and price.

REAL ESTATE CONSULTING SERVICES

The company provides real estate consulting services tailored to meet the needs of real estate developer clients at various stages of the project development and sales process and other clients with particular requests and needs. Its consulting services include services designed to help real estate developer clients formulate solutions to meet their specific needs and services designed to facilitate large-scale land or development project purchase and sale transactions. The company offers its services for a range of developments, including residential, commercial, office, lodging, industrial, tourism, and cultural developments.

Land Acquisition Consulting: Real estate developers retain the company in connection with their proposed acquisition of properties that are in the public bidding, auction or listing process or through negotiated transfers. The company provides developers with development potential and risk analysis reports of the properties under consideration, including information, such as comparable real estate transaction histories, potential target market for the development project or projected price. It also provides consultancy services to land owners to market the land to developers and introduce developers to land owners.

Real Estate Development Consulting: The company offers various services to developers who have obtained land development rights. It provides project feasibility studies that include general inf

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
