SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The China RuiTai International Holdings Co., Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows

presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes China RuiTai International Holdings Co., Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China RuiTai International Holdings Co., Ltd. business.

About China RuiTai International Holdings Co., Ltd.

China RuiTai International Holdings Co., Ltd., through its subsidiary, TaiAn RuiTai Cellulose Co., Ltd., engages in the production, sale, and export of deeply processed chemicals, with a primary focus on non-ionic cellulose ether products in the Peoples Republic of China.

Products

The company has 12 major product lines which are marketed under its brand name 'RuiTai'. Its product lines, which are focused around and related to cellulose ether, include Hydroxypropyl Methyl Cellulose (HPMC); Methyl Cellulose (MC); Ethyl Cellulose Aqueous Dispersion (EAD); Ethyl Cellulose (EC); Hydroxyethyl Cellulose (HEC); CMC; Microcrystalline Cellulose (MCC); HEMC; Hypromellose Phthalate (HPMCP); Hydroxypropyl Cellulose (HPC); and Film Coating Pre-Mixed Reagent. Cellulose ether is an organic chemical that dissolves in water and other organic solvents. Applications in which its products are used include as a stabilizer and thickener in latex paint; in

mortar dry mix for building materials; to improve the performance of resin in PVC production; as a membrane reagent, stabilizer, and thickener in pharmaceuticals; and to improve jam, ice cream, toothpaste, and lipsticks in the food and cosmetic industries.

Sales and Marketing

The company operates 30 sales offices throughout China. It operates two offices in both Beijing and Shanghai, and operates a single office in each of the following cities: Guangzhou, Qingdao, Nanjing, Chongqing, ChengDu, Shenyang, and Wulumuqi.

Customers and Markets

The company's customers include Changsha Xiangtai Technology Co., Ltd.; Bang and Bonsomer Co., Ltd.; and Viscochem Reselg and Development Ltd. It also exports ether products to foreign markets in the United States, Europe, India, and the Middle East.

History

China RuiTai International Holdings Co., Ltd. was founded in 1999.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
