## Abstracts

China Security & Surveillance Technology, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between China Security & Surveillance Technology, Inc. and its competitors. This provides our Clients with a clear understanding of China Security & Surveillance Technology, Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about China Security & Surveillance Technology, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for China Security & Surveillance Technology, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The China Security & Surveillance Technology, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows

presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes China Security & Surveillance Technology, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China Security & Surveillance Technology, Inc. business.

### **About China Security & Surveillance Technology, Inc.**

China Security & Surveillance Technology, Inc., through its subsidiaries, engages in the manufacture, distribution, installation, and servicing of surveillance and safety products and systems in China.

The company's customers are primarily comprised of: governmental entities, such as customs agencies, courts, public security bureaus, and prisons; non-profit organizations, including schools, museums, sports arenas, and libraries; and commercial entities, such as airports, hotels, real estate, banks, mines, railways, supermarkets, and entertainment venues.

#### Segments

##### Installation segment

The Installation segment provides design, sale, installation, service and monitoring of

electronics surveillance and safety systems to residential, commercial, industrial and governmental customers. The Installation segment performs installations of surveillance and safety products and systems for customer projects. It also provides project design, material supply, engineering, and operating maintenance services. It offers various services over its six divisions, including the Safe City Projects, Conventional Projects, Total Solutions, Home Security, Community Security, and Research and Development for both government and corporate customers. The segment consists of two operating subsidiaries: Golden and CSST PRC. The company's one-stop technical support and service system including project design, material supply, engineering, and operating maintenance offers an all-covered solution.

### Manufacturing segment

Manufacturing segment manufactures various products, including detectors, access controllers, high-speed demo video cameras, box cameras, digital video recorders (DVRs), video management systems, monitors, screens, computer software and systems, and accessories. The Manufacturing segment also designs, sells and develops these products. It markets its products both individually and as bundled packages of services and features. The segment also focuses on developing technology independently and in collaboration with its other business segments to develop new products.

The following eight subsidiaries operate in its Manufacturing segment:

**CSSM:** CSSM is responsible for the planning, manufacturing, marketing, research and development of surveillance and safety products produced by Manufacturing segment subsidiaries. CSSM also acts as the main customer service contact for its Manufacturing segment customers.

**Minking:** Minking specializes in the production, research, and development of closed-circuit television, or CCTV products, such as IP network high-speed dome cameras, pressure high-speed dome cameras, and intelligent high-speed dome cameras.

**HiEasy:** HiEasy is engaged in audio and video coder-decoder technology research and manufacturing.

**Hongtianshi:** Hongtianshi is a security digital camera manufacturer. Its products include video cameras, digital video cameras, and monitors.

**Stonesonic:** Stonesonic is a monitoring equipment solutions provider that engages in developing, manufacturing and promoting television broadcast terminals, screens, industrial monitoring, and medical treatment monitoring.

**Longhorn:** Longhorn specializes in the manufacture and installation of safety alarm systems in China and manufactures intruder alarm products, including a range of motion detectors, control panels, sirens, smoke and gas detectors, and alarm accessories.

**DIT:** DIT focuses on consumer safety system integration and export and positions itself as a 'one-stop source' surveillance and safety vendor. Its products and services cover consumer security systems and professional surveillance and safety solutions. DIT targets overseas markets. In 2009, all of DIT's products were sold to overseas markets, including the United States, Europe and South Asia.

**Coson:** Coson is an intelligent access control solution provider and provides control access solutions to a diverse group of clients that include government buildings, banks, post offices, universities, and large residential properties in China.

#### Distribution segment

Distribution segment is responsible for distribution and marketing of surveillance and safety products a

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
