The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ChinaEdu Corporation business.

About ChinaEdu Corporation

ChinaEdu Corporation provides educational services in China. The company's primary business is to provide services to the online degree programs of Chinese universities. It also offers online tutoring services to primary and secondary school students; operates primary and secondary schools; and markets international post-secondary and English language curriculum programs to established learning institutions.

The company's services include academic program development, technology services, enrollment marketing, recruiting, student support services, and finance operations. Its other lines of businesses include online tutoring services, the operation of private primary and secondary schools, and marketing and support for international curriculum programs.

Online Degree Programs

The company's primary business is to assist universities in China to establish, operate and expand their online degree programs. It provides services to 24 universities with their online degree programs and to 3 additional universities awaiting regulatory approval to begin their programs. The online degree programs that the company services offer associate and bachelor degree programs in a range of subjects, including

accounting, marketing, finance, business administration, international business, law, civil engineering, education, computer science, literature, project management, marketing and administrative management. These online degree programs are targeted primarily at working adults. The company has collaborative alliance agreements with Guangxi Radio and TV University (GRTU) and Fujian Radio and TV University (FRTU).

Services

The company, through collaborative alliances and other revenue-sharing arrangements, offers a service platform to its university customers, including academic program development, technology services, enrollment marketing, student support services, and finance operations. It also provides the initial capital resources needed to establish their online degree programs.

Academic Program Development: Academic program development entails the design and development of instructional materials, multimedia learning materials and quality assurance processes. The company has developed approximately 1,550 online courses for its university partners' programs.

Technology: The company's technological capabilities consist of a series of proprietary systems and tools, including its Learning Management System (LMS), which enables the online degree programs to manage the entire student life cycle from application to graduation by providing system support to the student's learning process and the university staff's daily management process. This system manages courseware, including multimedia lectures, assignments and quizzes, and provides management information tools supporting the course offerings. The company also provides certain customers a learning content creation and management system, which enables the team working on courseware development to bring the courseware from the concept and design stage to production and implementation. Its technology also supports an interactive, community-based learning environment through chat rooms, online forums and bulletin board systems. It also hosts and supports the software and hardware and software requirements of its online degree university partners.

Enrollment Marketing: The company's support for universities' student recruitment efforts includes the development and implementation of on-line and off-line marketing strategies and promotional events, as well as the creation of collateral material to support those efforts. It assists universities in identifying, retaining and supervising learning centers, including training learning center staff on executing its marketing programs.

Student Support Services: Support services that the company provides to students include online and offline tutorial resources, academic review sessions, student consultations and mock examinations. The company also maintains a staff of student service counselors whom students may call upon to address any questions they may have regarding the student support services.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
