## Abstracts

Chiyoda Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Chiyoda Corporation and its competitors. This provides our Clients with a clear understanding of Chiyoda Corporation position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about Chiyoda Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Chiyoda Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Chiyoda Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Chiyoda Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Chiyoda Corporation business.

## **About Chiyoda Corporation**

Chiyoda Corporation (the company) was established in 1948. The company is an Integrated Engineering Contractor. The company activities include Energy & Environmental, LNG, oil & gas, power, environmental preservation, Chemicals & Pharmaceuticals, From commodity chemicals to fine/specialty chemicals.

The company's services include project & program management; feasibility studies; feed; engineering; procurement; construction; commissioning; o & m; and asset management

Gas Processing, LNG & LPG

Gas Processing Projects

Chiyoda excels at integrating diverse elements into an overall plan that best matches clients' needs - High Production Capacity / Quality / On-stream Factor / Maintainability, Minimum Total Life Cycle Cost and Fast-track Schedule while placing first priority in Health, Safety and Environment (HSE) and the local sustainable development. The company has invaluable experience in all phases of has processing projects from feasibility studies through planning, design to financing in addition to overseeing large-

scale gas processing projects such as NGL/LNG projects.

### LNG (Liquefied Natural Gas) Projects

Baseload LNG projects completed by the company are currently producing more than 33 million ton per annum (mtpa). In addition, Chiyoda engages in Front End Engineering and Design (FEED) or Project Specification (PS) works by major LNG projects to bring measurable benefits to investors. Chiyoda is also a contractor of LNG receiving terminals, having been involved in extensive LNG receiving terminal projects mainly in Japan. Chiyoda continues to develop the start-of-the-art technology, design and project execution in gas processing and LNG chain to enable investors to create viable gas/LNG trade schemes in competitive and changing markets.

### Synthesis Gas

Chiyoda has engineered and built many plants, as is proven by its 60% share of Japanese hydrogen plant construction. As Integrated Gasification Combined Cycle (IGCC), Gas to Liquids (GTL), and Gas to Chemicals (GTC) become prevalent, demand for larger-scale, economical synthesis gas plants should arise. Chiyoda constantly works to develop innovative catalysts and furnace technologies, which enable longer and more stable operation in severe conditions at high temperatures and pressures.

### Chemicals

The Company's chemical plants help convert natural resources such as gas or oil into the materials that are easily turned into end products. The engineering and construction of chemical plants requires a vast storehouse of technical know-how. Chiyoda has accomplishments in various processes, including ethylene, propylene and its derivatives, C4/C5 distillates for synthetic rubber, aromatics related to paint and detergent or fiber materials, high performance polymers such as engineering plastics, and fine chemicals.

### Petroleum Refining

The company's expertise runs from initial business development, detailed feasibility studies, front-end engineering package development, detailed engineering, procurement, and construction, to final commissioning, start-up, and operation and maintenance services. The company's track record includes grassroots, expansion and revamp projects.

Some of the company's solid accomplishments include developing new technology and commercializing licensed technologies. Examples of commercialization include residuum desulfurization process (RDS) and vacuum residuum desulfurization process (VRDS) plants.

Chiyoda succeeded in commercializing the Onstream Catalyst Replacement (OCR) process as a pretreatment system of heavy oil direct desulfurization plants, and was able to build Japan's first residual oil hydrocracking plant through its H-OIL process.

### Metals & Mining

The company services in development, engineering, procurement, construction, can meet the needs of all kinds of projects in metal and mining industries around the world.

### Environmental

Chiyoda has been engaged in the engineering and construction of energy plants, including petroleum, chemicals, natural gas, and thermal power generation.

Chiyoda is engaged in engineering by making full use of its environmental conservation technology. Chiyoda supp

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
