Such information creates your awareness about principal trends of CIBER, Inc. business.

## **About CIBER, Inc.**

CIBER, Inc. operates as a diversified, system integration and information technology (IT) services consulting firm.

### Segments

The company's segments include Custom Solutions; International; IT Outsourcing; Federal; and U.S. ERP.

### Custom Solutions

Custom Solutions division focuses on providing custom development, integration and support to U.S.-based commercial, and state and local government clients. The company provides a range of application portfolio management support, including analysis, design, development, testing, implementation, and maintenance of business applications. Its delivery capabilities span service-oriented architectures, including J2EE and .NET, as well as traditional client/server and mainframe development. The company also offers portal development, wireless, and mobility applications and content delivery.

The Custom Solutions division has developed expertise in various commercial verticals,

including the automotive, manufacturing, services, retail, financial, and telecommunications industries, as well as its expanded strategic consulting practices, which include IT Strategy, Architecture, Business Intelligence/Data Warehousing (BI/DW), Collaborative Solutions and Supply Chain. The Custom Solutions division also has expertise in various government verticals, including Health and Human Services and Public Health, Transportation, Administration, and Law and Justice. The company's five domestic delivery centers are located in Tampa and Orlando, Florida, Pittsburgh and Harrisburg, Pennsylvania, and Detroit, Michigan.

## International

CIBER International division, headquartered in the Netherlands, delivers a mix of enterprise and custom solutions. CIBER International is a full-line service provider, able to offer a range of services covering the full IT solution lifecycle to clients in both commercial enterprises and public sector organizations. Key geographies for the company's International division include the Netherlands, the United Kingdom, Germany and the Scandinavian region consisting of Norway, Sweden, Denmark, and Finland.

The company's enterprise solutions focus primarily on providing services related to Enterprise Resource Planning (ERP) and Customer Relationship Management (CRM) software products. Its partner relationships in Europe and Asia/Pacific include SAP and Microsoft, with SAP-related solutions and services. The company has Special Expertise status in SAP Industry Solutions, such as Retail, Automotive and Chemicals. It operates as a value-added reseller of SAP software in some geographies. The company also works with Microsoft to deliver ERP and CRM solutions in selected geographies. It builds custom solutions based on technologies, such as Microsoft and Oracle to develop Web services applications, implement workflow solutions, integrate legacy systems as part of an extended enterprise and build information infrastructures through the use of BI/DW technologies.

## IT Outsourcing

IT Outsourcing division is a global and expanding business with domestic headquarters in Edison, New Jersey and international presence throughout Europe, offering a set of solutions that span the entire spectrum of IT infrastructure and IT operations services. The company's solutions range from help desks and hosting, to software rollouts and security monitoring, to server virtualization and more, in data centers in the U.S., the United Kingdom, the Netherlands, and Spain, and global support centers in the U.S., the United Kingdom and India.

## Federal

Federal division provides a range of custom IT services and support for U.S. federal government projects, including specialized strategic staffing, security assessments, legacy modernization services, data warehousing solutions and help desk support. The company provides these services to defense and civilian agencies, both domestic and abroad, including all branches of the U.S. military.

The Federal division is aligned along a customer focus to allow each practice to provide a set of capabilities to customers. The alignment also allows the company to establish client relationships and fit within each client's culture. These customer-f

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
