Abstracts

Clayton Williams Energy Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Clayton Williams Energy Inc. and its competitors. This provides our Clients with a clear understanding of Clayton Williams Energy Inc. position in the [Energy](#) Industry.

The report contains detailed information about Clayton Williams Energy Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Clayton Williams Energy Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Clayton Williams Energy Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Clayton Williams Energy Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Clayton Williams Energy Inc. business.

About Clayton Williams Energy Inc.

Clayton Williams Energy, Inc., an independent oil and gas company, engages in the exploration and production of oil and natural gas primarily in Texas, Louisiana, and New Mexico.

As of December 31, 2009, the company's estimated proved reserves were 33,637 thousand barrels of oil equivalent. It held interests in 6,750 gross (941.2 net) producing oil and gas wells; and owned leasehold interests in approximately 1.1 million gross (618,000 net) undeveloped acres.

Exploration and Development Activities

Permian Basin

The Permian Basin is a sedimentary basin in West Texas and southeastern New Mexico. The company drilled 51 gross (47.5 net) operated wells in the Permian Basin and conducted various remedial operations on other wells in 2009.

Andrews County – Wolfberry: The company has a block in Andrews County, Texas on which it has identified approximately 200 potential locations for Wolfberry wells. A

Wolfberry well is a well that commingles production from the Spraberry and Wolfcamp formations. During 2009, the company drilled and completed 13 gross (11.7 net) wells in this area.

Fuhrman-Mascho Field: The company also resumed a drilling program in the Fuhrman-Mascho Field in Andrews County, Texas beginning in July 2009. During 2009, the company drilled and completed 20 gross (18.2 net) wells in this area. It also completed additional 4 gross (3.6 net) wells.

Austin Chalk (Trend)

During 2009, the company drilled and completed 3 gross (2.9 net) wells in this area. It also completed 2 gross (2 net) wells.

Eagle Ford Shale

The Eagle Ford Shale is a formation immediately beneath the Austin Chalk (Trend) formation. The company has drilled a horizontal well in Burleson County, Texas to test the Eagle Ford Shale underlying its existing Austin Chalk (Trend) acreage. The well is producing.

South Louisiana

The company participated in the drilling of the State Lease 18669 #1, an exploratory well in Plaquemines Parish (West Lake Washington prospect) and the well was placed into production in June 2009. The company owns a 50% non-operated working interest in this well.

North Louisiana

In this area, the Cotton Valley/Gray formations are encountered at depths ranging from 8,000 to 12,000 feet, and the Bossier formation is encountered at depths ranging from 11,000 to 15,500 feet. As of December 31, 2009, the company had drilled 18 wells on its Terryville prospect and had completed 16 wells as producers. On its Ruston prospect, the company has completed 4 wells as producers.

East Texas Bossier

The company has an acreage position in East Texas targeting the prolific deep Bossier

sands which are encountered at depths ranging from 14,000 to 22,000 feet in this area. It has completed the drilling of the Sunny Unit #1, a 17,300-foot exploratory well in Burleson County, Texas.

Natural Gas Services

The company owns an interest in and operates natural gas service facilities in the states of Texas, Louisiana, Mississippi, and New Mexico. These natural gas service facilities consist of interests in approximately 94 miles of pipeline, 3 treating plants, 1 dehydration facility, 3 compressor stations, and 4 wellhead type treating and/or compression facilities.

History

Clayton Williams Energy, Inc. was founded in 1991.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
