## Abstracts

Clean Harbors, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Clean Harbors, Inc. and its competitors. This provides our Clients with a clear understanding of Clean Harbors, Inc. position in the [Commercial Services and Supplies](#) Industry.

The report contains detailed information about Clean Harbors, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Clean Harbors, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Clean Harbors, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Clean Harbors, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Clean Harbors, Inc. business.

### **About Clean Harbors, Inc.**

Clean Harbors, Inc., through its subsidiaries, provides environmental, energy, and industrial services throughout North America. The company has a network of approximately 175 service locations, including 52 active hazardous waste management properties. These properties include 6 incineration facilities, 9 commercial landfills, 7 wastewater treatment facilities, 20 transportation, storage and disposal facilities (TSDFs), 2 solvent recycling facilities, and 8 locations specializing in polychlorinated biphenyls (PCB) management and oil storage and recycling. The company also operates international locations in Bulgaria, China, Singapore, Sweden, Thailand and the United Kingdom.

In July 2009, the company acquired 100% interest in Eveready Inc. (Eveready). Eveready provides industrial maintenance and production, lodging, and exploration services to the oil and gas, chemical, pulp and paper, manufacturing, and power generation industries.

### **Segments**

The company conducts its operations through four segments, including Technical Services, Field Services, Industrial Services, and Exploration Services.

## Technical Services

Technical Services provides a range of hazardous material management services, including the packaging, collection, transportation, treatment, and disposal of hazardous and non-hazardous waste at company-owned incineration, landfill, wastewater, and other treatment facilities.

Technical Services involve the collection, transport, treatment and disposal of hazardous and non-hazardous wastes, and include resource recovery, physical treatment, fuels blending, incineration, landfill disposal, wastewater treatment, lab chemical disposal, explosives management, and CleanPack services. The company's CleanPack services include the collection, identification and categorization, specialized packaging, transportation, and disposal of laboratory chemicals and household hazardous wastes.

**Collection, Transportation and Logistics Management:** As an integral part of its services, the company collects industrial wastes from customers and transports such wastes to and between its facilities for treatment or bulking for shipment to final disposal locations.

**Treatment and Disposal:** The company recycles, treats, and disposes of hazardous and non-hazardous industrial wastes. The wastes handled include substances, which are classified as 'hazardous' because of their corrosive, ignitable, infectious, reactive, or toxic properties, and other substances. The company provides final treatment and disposal services designed to manage wastes which cannot be otherwise economically recycled or reused. The wastes the company handles come in solid, sludge, liquid, and gas form.

The company operates a network of TSDFs that collect, temporarily store and/or consolidate compatible waste streams for transportation to final recycling, treatment or disposal destinations. The types of waste the company handles include flammables, combustibles and other organics; acids and caustics; reactive waste; cyanides and sulfides; industrial wastewaters; items containing polychlorinated biphenyls (PCBs), such as utility transformers and electrical light ballasts; other regulated wastes; and non-hazardous industrial waste.

**Resource Recovery and Fuels Blending:** The company operates recycling systems for the reclamation and reuse of certain wastes, particularly solvent-based wastes generated by industrial cleaning operations, metal finishing, and other manufacturing

processes. Resource recovery involves the treatment of wastes using various methods, which remove contaminants from the original material to restore its fitness for its intended purpose and to reduce the volume of waste requiring disposal.

Incineration: The company has six active incineration facilities that offer a range of technological capabilities to customers through this network. In the United States, the company operates a fluidized bed thermal oxidation unit for maximum destruction efficiency of hazardous waste. The company also operates two hazardous waste liquid injection incinerators in Canada.

The company's incineration facilities in Kimball, Nebraska, Deer Park

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
