It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The CleanPath Resources Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes CleanPath Resources Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of CleanPath Resources Corp. business.

### **About CleanPath Resources Corp.**

CleanPath Resources Corp., an exploration stage company, engages in the acquisition and exploration of mineral properties in the United States and Canada.

In June 2007, the company acquired a 100% interest in the Reilly Uranium Property in the Sault St. Marie district of Ontario, Canada from Rubicon Minerals Corp.

### **Properties**

#### **Bancroft Properties**

The Bancroft Uranium Projects Claims consist of eight uranium properties located in the Bancroft area of southeastern Ontario, Canada. The properties comprise of 37 mineral claims covering approximately 9,765 acres (3,952 hectares), and are located 10 - 40 km to the east of the town of Bancroft.

**Halo Prospect:** The Halo Property, located in Cardiff Township, is comprised of 12 claim units totaling 4,793 acres, which were staked approximately 6 uranium deposits.

**Silver Crater - Baumhour - Campbell:** This property is composed of 5 claims totaling

approximately 1,789 acres, and is located in Faraday Township.

Canadian All Metals Occurrence: This property is composed of 4 claim units, which total approximately 940 acres and is located in Monmouth Township.

Empire B Prospect: Located in Monmouth and Cardiff Township, this property represents 3 claim units totaling approximately 1,087 acres.

Amalgamated Rare Earth #2 Prospect: This property is comprised of 3 claim units with approximately 988 acres in total in Monmouth Township.

Saranac: 2 claims have been staked on this property, totaling approximately 691 acres, located in Monmouth Township.

McLean - Hogan Occurrence: This property consists of 2 claims (approximately 691 acres) located in Cardiff Township.

Canada Radium Occurrence: This property is composed of three claims of approximately 840 acres, and is located in both Cardiff and Faraday Townships.

#### Wheeler-Beckett Project, Saskatchewan

The Wheeler-Beckett Project consists of 11 contiguous claims (the Claims) totaling 51,100 hectares located on the eastern edge of the Athabasca Basin. The company holds a 100% interest in the property.

#### OK Lake Property, British Columbia

The OK Lake Property consists of two prospective Uranium property claims in the Vernon Mining Division of BC, called the OK Lake claims. These claims have available files registered with the BC Mining Files under the names BALD and OYAMA 2 Claim.

#### Don McCarthy Project, Ontario

The Don McCarthy Claim is a single 4087-hectare claim (10100 acres), previously controlled by International Uranium Corp/Denison Mines Corp., which has a significant presence in the area.

#### History

CleanPath Resources Corp. was founded in 2004. The company was formerly known as Boulder Creek Explorations, Inc. and changed its name to CanAm Uranium Corp. in 2006, and further changed its name to CleanPath Resources Corp. in July 2008.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
