## Abstracts

Clinical Data, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Clinical Data, Inc. and its competitors. This provides our Clients with a clear understanding of Clinical Data, Inc. position in the Industry.

The report contains detailed information about Clinical Data, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Clinical Data, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Clinical Data, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Clinical Data, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Clinical Data, Inc. business.

### **About Clinical Data, Inc.**

Clinical Data, Inc. focuses on the development and commercialization of therapeutics with primary focus on the areas of central nervous system and cardiovascular disorders. In addition, the company provides a family of genetic tests for inherited cardiac syndromes.

### **PHARMACEUTICAL PIPELINE**

#### **Vilazodone**

The company's primary drug candidate, vilazodone, is a dual-acting modulator of serotonin neurotransmission in development for the treatment of major depressive disorder (MDD) with the potential for follow-on indications, including generalized anxiety disorder and other related mood disorders. Vilazodone is a selective and potent serotonin reuptake inhibitor and serotonin receptor 1A (5-HT<sub>1A</sub>) partial agonist. The company has filed new drug application (NDA) with the U.S. Food and Drug Administration (FDA) for this product. The company holds rights to develop and commercialize vilazodone pursuant to a license agreement it entered into with Merck KGaA, Darmstadt, Germany (Merck).

## Stedivaze

The company's second late-stage drug candidate is apadenoson, trademarked Stedivaze, a selective adenosine receptor 2A (AR2A) agonist and potential coronary vasodilator in Phase III of clinical development for use in nuclear single photo emission computed topography (SPECT) myocardial perfusion imaging.

## Other Therapeutics in Development

**ATL313:** ATL313 is a selective AR2A agonist in preclinical development as a topical treatment for glaucoma that has shown significant effects on lowering intra-ocular pressure in both small and large animal models. In May 2010, Santen Pharmaceutical Co., Ltd. (Santen) has exercised its option to further develop ATL313 for the treatment of glaucoma. ATL313 is also the subject of a license agreement with CombinatoRx, Inc. (CombinatoRx) for the development of treatments for B-cell cancers, including multiple myeloma. Under this collaboration, CombinatoRx would be responsible for both preclinical and clinical development. ATL313 and other AR2A agonists are also being evaluated by the company in animal models of chronic pain and multiple sclerosis.

**ATL844:** The company is developing ATL844 for the treatment of asthma and/or diabetes, both of which are growing, multi-billion dollar markets. Acting as an adenosine receptor 2B (AR2B) antagonist, this compound has shown significant pharmacodynamic effects in animal models for both asthma and diabetes. The company is proceeding with a toxicology and chemistry program. ATL844 is also the subject of an option agreement for a license by Novartis AG for the treatment of asthma and diabetes.

**ATL1222:** ATL1222 is a selective AR2A agonist in development as an anti-inflammatory agent for the treatment of acute inflammatory conditions based on effects demonstrated in animal models. ATL1222 is being evaluated in pharmacodynamic studies.

**AVN316:** AVN316 is small molecule that potently inhibits the beta-catenin pathway in various model systems. This compound and program is under consideration for further development and potential partnering.

## GENETIC TESTS

The company also provides the FAMILION family of genetic tests for inherited cardiac syndromes, including cardiac channelopathies and cardiomyopathies. The FAMILION family of tests identifies mutations in genes associated with inherited cardiac syndromes

including cardiac channelopathies, such as long-QT syndrome (LQTS), brugada syndrome (BrS), catecholaminergic polymorphic ventricular tachycardia (CPVT), and short QT syndrome (SQTS), and in genes associated with cardiomyopathies, including hypertrophic cardiomyopathy (HCM), arrhythmogenic right ventricular cardiomyopathy (ARVC), dilated cardiomyopathy (DCM), and conduction disease associated with DC (CD-DCM).

### Acquisitions

In September 2009, the company purchased the assets of Epix Pharmaceuticals, Inc. (Epix) related to the PRX-08066 drug program, which is a selective 5-HT<sub>2B</sub> antagonist in Phase II development for pulmonary hypertension.

### Dispositions

In 2009, the company sold the operations of Cogenics, Inc., Epidauros Biotechnologie AG and Cogenics Genome Express S.A.

### History

Clinical Data, Inc. was founded in 1969.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
