Such information creates your awareness about principal trends of Cms Bancorp, Inc. business.

About Cms Bancorp, Inc.

CMS Bancorp, Inc. operates as the holding company for Community Mutual Savings Bank, which offers various banking services to individuals and small businesses primarily in Westchester County and the neighboring areas in New York.

The company's primary market area is Westchester County, New York, a northern suburb of New York City. It conducts its retail banking operations from its corporate administrative office located in White Plains, the county seat for Westchester, and five retail banking offices located in Eastchester, Greenburgh, Mount Kisco, Mount Vernon, and West Harrison, New York.

Lending Activities

The company originates residential loans, commercial real estate loans, and consumer loans. It also originates multi-family, non-residential, construction, home equity, second mortgage loans and commercial loans both within and outside of Westchester County, New York.

Residential Mortgage Lending: The company focuses on the origination of mortgage loans secured by one- to four-family properties that serve as the primary residence of

the owner. It offers conventional mortgage loans. It also offers adjustable-rate mortgage loans.

Multi-family Loans: The company offers loans secured by real estate improved with multi-family (five or more units) buildings.

Construction Loans: The company offers short-term construction loans to builders for projects that are substantially preleased or presold. These types of loans are secured by personal guarantee of the builder.

Home Equity Loans and Lines of Credit: The company offers home equity loans and lines of credit that are secured by the borrower's primary residence.

Non-Residential Real Estate Loans: The company's non-residential real estate portfolio consists of loans that are collateralized by properties in its normal lending area.

Commercial Loans: In addition to non-residential real estate loans, the company also offers small business commercial lending, including business installment loans, lines of credit, and other commercial loans.

Consumer Loans: The company offers various consumer loans to serve customer demand and the needs of the community.

Investment portfolio

As of September 2010, the company's investment portfolio included U.S. agency obligations and mortgage-backed securities, such as Federal Home Loan Mortgage Corporation.

Deposits

The company's deposit products include regular savings deposits (consisting of passbook and statement savings accounts), interest-bearing demand accounts, non-interest-bearing demand accounts, money market accounts, and time deposits.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
