Abstracts

Codexis, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Codexis, Inc. and its competitors. This provides our Clients with a clear understanding of Codexis, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Codexis, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Codexis, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Codexis, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Codexis, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Codexis, Inc. business.

About Codexis, Inc.

Codexis, Inc. develops proprietary biocatalysts that would revolutionize chemistry-based manufacturing processes across various industries.

The company has focused its biocatalyst development efforts on various markets, including pharmaceuticals and biofuels. It is pursuing funded collaborations in other bioindustrial markets, including carbon management, water treatment, and chemicals.

Products and Services

The company's products and services enable it to add value throughout the drug lifecycle, from preclinical development to clinical development and commercialization.

Codex Biocatalyst Panels: The company sells Codex Biocatalyst Panels to customers who are engaged in preclinical and clinical drug development to allow them to screen and identify possible biocatalytic manufacturing processes for their drug candidates. Its Codex Biocatalyst Panels are plates embedded with genetically various variants of its proprietary biocatalysts, which allow its customers to determine whether a biocatalyst produces a desired activity that is applicable to a particular process.

The company's Codex Biocatalyst Panels: allow innovators to screen and identify

possible biocatalytic manufacturing processes for their drug candidates in-house, without the risks of disclosing the composition of their proprietary molecules before they have received patent protection; and generate data that the company can use to optimize biocatalysts for a particular reaction.

Biocatalyst screening services: The company supplies the customer with the biocatalyst or perform optimization services to improve the performance of the biocatalyst. Its screening services: allow innovators to screen and identify possible biocatalytic manufacturing processes through access to its biocatalyst libraries; and generate data that the company can use to optimize biocatalysts for a particular reaction. The company has provided screening services to various innovator and generic pharmaceutical manufacturers.

Biocatalyst optimization services: The company works with its innovator customers during preclinical and clinical development to customize proprietary biocatalysts, resulting in optimized biocatalysts that have been evolved specifically to perform a desired process according to a selective set of specifications. The company's biocatalyst optimization services: allow innovators to improve the manufacturing process as their drug candidates progress through preclinical and clinical development.

Biocatalysts: The company supplies varying quantities of its proprietary biocatalysts to pharmaceutical companies, from small to moderate quantities while they are optimizing their production processes, to larger quantities during later-stage clinical development and commercial scale drug production. The company's biocatalysts: enable innovators to manufacture products during preclinical and clinical development using optimized biocatalytic processes; eliminate the need for innovators to invest in the development of chemical synthesis routes during the development stage; reduce the risk of adverse effects arising from impurities; and allow the removal of entire steps from synthetic chemical production routes during commercial scale production.

Intermediates and APIs: The company supplies intermediates and APIs to its customers throughout the drug lifecycle. In the innovator market, the company intends to supply Pfizer with an intermediate in the scale-up and manufacture of a product candidate for upcoming clinical trials. The company also develops and, in partnership with Arch, manufactures and sells generic intermediates in the non-regulated markets. Its generics product portfolio and pipeline includes intermediates and APIs for infectious disease, cardiovascular and central nervous system indications, with expansion planned to a number of other therapeutic categories. It intends to sell this intermediate to manufacturers who would market the generic version of Lipitor in the United States and

Europe once the composition of matter patents for Lipitor expire in those markets.

Strategic Collaborations

The company has entered into a technology transfer and s

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
