Such information creates your awareness about principal trends of Cohen & Steers Inc. business.

About Cohen & Steers Inc.

Cohen & Steers, Inc., together with its wholly-owned subsidiaries, manages income-oriented equity portfolios specializing in the United States and international real estate securities, large cap value stocks, listed infrastructure and utilities, and preferred securities.

The company also manages alternative investment strategies, such as hedged real estate securities portfolios and private real estate multimanager strategies for qualified investors. The company serves individual and institutional investors through a range of investment vehicles.

Closed-End Mutual Funds: The nine closed-end mutual funds for which the company is the investment advisor are registered investment companies that have issued a fixed number of shares through public offerings. These shares are listed on the New York Stock Exchange.

Institutional Separate Accounts: The 111 institutional separate accounts for which the company is the investment advisor represent portfolios of securities the company manages for institutional clients. The company manages the assets in each institutional separate account in a manner modified to the investment preferences of that individual

client as defined with in each client's individual investment advisory agreement.

Portfolio Consulting and Other Services: As portfolio consultant, the company provides several services in connection with investment products, such as unit investment trusts (UITs). As portfolio consultant to UITs, the company constructs a portfolio of securities suited to satisfying the investment objective of the UIT. The company also provides ongoing portfolio monitoring services related to the portfolio. Finally, the company provides a license to certain firms to use its name in connection with certain of their investment products.

Additionally, the company provides services in connection with unified managed accounts (UMAs). In addition, the company maintains two proprietary indices, Cohen & Steers Realty Majors Index (RMP) and Cohen & Steers Global Realty Majors Index (GRM), which are the basis for the iShares Cohen & Steers Realty Majors Index Fund (ICF) sponsored by BlackRock Institutional Trust Company, N.A. and Cohen & Steers Global Realty Majors Fund (GRI) sponsored by ALPS Fund Services, Inc., respectively.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
