The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Comcast Corporation business.

About Comcast Corporation

Comcast Corporation provides cable services in the United States. The company offers various entertainment, information, and communication services to the residential and commercial customers.

Segments

The company's segments include Cable and Programming.

Cable

The Cable segment manages and operates cable systems, including video, high-speed Internet, and phone services, as well as regional sports and news networks. Its video services include analog, digital, on demand, and high-definition television and/or digital video recorders.

Cable Services

The company offers various services over its cable systems, including video, high-speed Internet and phone services. It markets its cable services individually and in

packages. It offers video services to restaurants and hotels, and cable services to small and medium-sized businesses (commercial services).

Video Services

The company's video service offerings range from a limited analog service to a digital service, as well as services, which consist of high-definition television (HDTV) and/or digital video recorders (DVR). Its analog video services range from a limited basic service with access to between 20 and 30 channels of programming to an expanded basic service with access to between 60 and 80 channels of programming. The company's digital video services range from a digital starter service with access to between 40 and 50 channels to a full digital service with access to approximately 250 channels. Its video services generally include programming provided by national and local broadcast networks, national and regional cable networks, as well as governmental and public access programming. Its digital video services generally include access to approximately 40 music channels, its On Demand service and an interactive, on-screen program guide. The company also offers packages with Spanish-language programming, as well as specialty tiers with sports, family or international themes.

The company's video customers may also subscribe to premium channel programming. Premium channels include cable networks, such as HBO, Showtime, Starz, and Cinemax, which generally offer, without commercial interruption, movies, original programming, live and taped sporting events, concerts and other special features.

The company also offers a fee-based On Demand service that provides its video customers the opportunity to order individual new release and library movies and special-event programs, such as professional boxing, professional wrestling and concerts. Its HDTV service offers its digital video customers a selection of high-definition programming choices, including most major broadcast networks, national cable networks, premium channels and regional sports networks. In addition, its On Demand service provides approximately 2,600 HDTV programming choices over the course of a month. The company's DVR service also provides the ability to pause and rewind live television. During 2009, the company began to offer certain cable network programming online to customers of both its video and high-speed Internet services through Fancast XFINITY TV.

High-Speed Internet Services

The company offers high-speed Internet services with Internet access at downstream speeds of up to 50 Mbps, depending on the service selected and subject to geographic market availability. These services also include its interactive portal, Comcast.net, which provides multiple e-mail addresses and online storage, as well as a various content and value-added features. Its commercial high-speed Internet service also includes a Web site hosting service and an online tool that allows customers to share, coordinate and store documents.

Phone Services

The company offers a Voice over Internet Protocol (VoIP) digital phone service that provides either usage-based or unlimited local and domestic long-distance calling, including features, such as voice mail, caller ID and call waiting. Its commercial phone service also includes a business directory listing and the option to add multiple phone lines.

Advertising

As part of its programming license agreements with programming networks, the compa

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
